For a Child's Smile - For a Photographer's Camera

A child's smile is a very precious thing. In a split second it can melt your heart, and in the next, it can disappear right before your eyes. For a photographer, capturing a child's smile is a very rewarding prize. Yet attaining it can be extremely challenging.

Now, there's a new and revolutionary way to capture that smile:

Meet the DaisyGrip™

– Every Child Photographer's New Best Friend –

After years of first hand experience, the owners of **Christine DeSavino Photography** give you the power to take control of the space just above your camera. With the DaisyGrip™ you can put on a puppet show or attach a child's favorite stuffed animal. Or better yet, stick your iPhone® playing Dora the Explorer® into the DaisyGrip™, and those natural smiles and giggles are yours for the capturing.

The DaisyGrip™ puts the "smile" back in your control. Your days of wishing you had a third hand or depending on a parent to wave toys just above your shoulder are gone for good.

There are so many ways to use the DaisyGrip™ that its possibilities are limited only by your imagination.

Details:

- « an ultra-flexible hand with 4 fingers that are easily bent, yet firmly maintain their shape
- « connects to the top of your SLR camera via a standard hot shoe
- « connects to the top of a tripod
- « holds a variety of toys, stuffed animals, finger & hand puppets
- « holds an iPhone® or other similarly sized smartphones, including many popular Android® phones
- « holds phones with or without a protective case – either way the DaisyGrip™ will handle it!
- « can be used simultaneously with a wireless transmitter for studio work
