# Welcome from our CEO & Founder

I believe that innovation comes easy if your mind and heart are put fully into the work you do. With this in mind, years ago I saw an opportunity to innovate on the already-established packaged pump industry with the concept of variable speed technology—and

that's how QuantumFlo was born. Today, our company has grown and evolved to a position of leadership in the industry with the best packaged pump systems for commercial and industrial applications; and we plan to continue innovating for many years to come.

- David Carrier

# [ About Us ]

QuantumFlo is a leader in the manufacturing and distribution of advanced, variable speed controlled, packaged pump systems for commercial plumbing, HVAC, municipal, irrigation and industrial market applications. Our innovative technologies feature aftermarket applications for the modification, upgrade and retrofit of aging or obsolete pump systems. With representatives in more than 23 countries, our highly skilled professionals are ready to help you find what you're looking for on your next project.

# [ Products ]

With unmatched performance and riveting system designs, QuantumFlo's wide range of advanced products has continued to set us apart year after year. From pre-packaged pump solutions to specific designs, our company provides you with the reliability and security you need.

QuantumFlo has tackled the many industry challenges of today technologically, rather than exclusively through mechanics. Our unique and custom designs are simple, light and durable, compact and most importantly, highly intelligent.

## Custom UL508A Industrial Controls

**In January 2011, QuantumFlo launched Quantum Custom Controls Division—a business unit designed to serve other OEM customers and end users who require a customized**

**UL508A Listed, controller solution which can be produced as either an OEM component or a project-specific solution. Following the dedicated development process and the launching of the new division, QuantumFlo is now an official UL508A Industrial Control Panel Manufacturer, one of several**

**National EATON Corporation Controls Partners in the United States. QuantumFlo's custom control packages and break-through, panel-upgrade program allows users to adjust only the control panel while existing pumps are left in place and can be used for virtually any pumping application.**

## Genius E

QuantumFlo's Genius E features cast iron, end suction, centrifugal pumps, and is designed for the tightly-contested, bid and spec market. All systems feature stainless steel frames, headers and inter-connecting piping, color touch-screen controls and variable speed pressure control.

**Explore more Genius E features and benefits:**

- » Competitively priced for bid & spec projects
- » Color touch-screen controls
- » 304 stainless steel header & frame
- » End suction pumps
- » Long service life & simple to maintain
- » High flow – low boost

## Genius V

The QuantumFlo Genius V system features stainless steel, vertical, multi-stage pumps with a cast iron base and bracket. This system is designed for low-flow, high boost conditions.

**Explore more Genius V features and benefits:**

- » Color touch-screen controls
- » 304 stainless steel header & frame
- » Long service life & simple to maintain
- » High boost – low flow

## WisperFlo

The QuantumFlo WisperFlo system is our flagship product line. Featuring a submersible turbine pump contained inside the system piping, this fully-submerged design takes advantage of the sound attenuating properties of water, virtually eliminating motor and pump noise.

**Explore more WisperFlo features and benefits:**

- » Color touch-screen controls
- » Long service life & simple to maintain
- » High boost – low flow – low noise

## Prodigy

The QuantumFlo Prodigy system is a variable speed, duplex booster system specially designed to compete with lower quality constant speed packages. All Prodigy systems feature stainless steel frames, headers and inter-connecting piping, touch screen interface and variable speed pressure control.

**Explore more Prodigy features and benefits:**

- » Variable speed drive control—NO PRV's
- » Economical cast-iron, bronze fitted pumps
- » Glycerin-filled suction/discharge gauges
- » 304 stainless steel header & frame
- » Vertical multi-stage pumps
- » Grooved end or flanged end connections

## Atom

**Understanding that low water pressure can affect homes too, QuantumFlo now offers a small, variable speed pump for residential applications that is also available for sale in retail markets. Call us to learn more about The Atom residential pump.**

# [ Contact Us ]

With such unique industries and diverse applications, we know you have questions—and QuantumFlo has a highly skilled and trained staff ready to guide you in the right direction with your next pump system purchase.

**Contact us today to learn more or to schedule a meeting to discuss your specific project needs.**
