

## CASE STUDY

CipherLab Customer Spotlight: Tung-Wah Hospital

### 1660 accelerates the asset management in hospital

#### Profile

Established in 1870, the Tung Wah Hospital is widely recognized as the first hospital in Hong Kong having adopted western hospital mode in providing Chinese medicine services. Following several redevelopment projects, the hospital is now a regional general hospital with 707 beds. It serves a sizeable population including Central, Sheung Wan, Western & Southern Districts.

#### Challenge

The fixed assets in hospital were checked manually in the past. The auditor was required to record the relative information and input those updates to the back end system. Such a process consumed lots of time and could result in human errors.

#### Deployment

The asset management is now done with 1660 pocket size Bluetooth scanner. For assets located indoors, the information is recorded by 1660 which connects with a PC via web-based application. As for outdoor assets, the 1660 is used with a laptop for immediate information upload. The new solution saved them a lot of efforts and prevented human errors in asset management.

#### About the CipherLab 1660 Series Pocket size Bluetooth Scanner

Designed for healthcare, field sales and field service environments with strong mobility requirement, the CipherLab 1660 series brings the highest flexibility to the workers in the field. It delivers a great amount of scans over a day of work on a pair of replaceable AAA batteries or the option of rechargeable Li-ion battery. The Bluetooth communication and pocket-sized form factor with extreme lightweight unleash workers and allow them to go where the work is and get more done, in more places. Besides, when used as a memory scanner, the 1660 series holds over 10 thousand scans.

**About CipherLab**

CipherLab is a global leader in the design, manufacture, and marketing of Automatic Identification and Data Capture products and systems. The company's mobile computers and scanners are integrated into the networks of some of the world's best known logistics, retail, distribution, government installations and healthcare companies, helping them run more efficiently and effectively onsite and on the road. Operating worldwide, CipherLab is headquartered in Taipei, Taiwan with offices in China, Germany, and the USA and is publicly traded on the Taiwan stock exchange (Taiwan OTC: 6160).
