

RESARA SERVER

The Powerful and Affordable Solution for Running Your Network

Resara Server is an easy and affordable server solution for your network. It provides an Active Directory compatible domain that features user and computer management, drive mapping, file serving, DNS/DHCP management, web-based remote file access, and much more.

There is no user or computer licensing, so you can join as many Windows, Apple, or Linux computers to your domain for no additional cost.

Main Features

Powerful Domain Controller

Compatible with all versions of Windows, Apple, and Linux. Configure domain user policies, DNS/DHCP settings, and more.

Network Management

Manage and secure users, groups, and computers on your network.

Automatic Drive Mapping

Create file shares and assign them by user, group, or computer. No scripting necessary with our point-and-click drive mapping tools.

Built-in Remote File Access

Access your files and drive maps from anywhere with a web browser. Resara's web based file browser and document editing add-ons are ideal for remote and mobile users.

Why Use Resara Server?

Incredibly Easy to Use

Resara Server makes network management simple, fast, and enjoyable! Our intuitive setup wizard and management tools are easy enough for anyone to use.

Unlimited User Licensing

Add as many users or computers to your domain for no additional cost or hassle.

Cost Effective

Resara Server Standard Edition is just \$749 with unlimited user and computer licensing!

Secure and Reliable

Built on Linux, Resara is not vulnerable to viruses or malware like other servers.

Excellent Support

Has Microsoft answered your calls lately? Resara Server comes with unlimited phone, email, or chat-room support direct from the manufacturer.
