

FOR IMMEDIATE RELEASE:

DyneGroup Names General Wesley K. Clark to Board of Advisors

Little Rock, AR, USA - January 23, 2012 - DyneGroup, Inc., a Dallas-based alternative energy products and services company, is honored to announce the appointment of General Wesley Clark to its Board of Advisors. During his 38 years of service with the United States Army, Clark rose to the rank of four-star general and served as NATO's Supreme Allied Commander, Europe. Since retiring from the military in 2000, he has taken on the roles of investment banker, cable network television military analyst, author, and alternative energy champion. Clark has chaired several public and private companies, and is a progressive leader in pursuing energy solutions.

When addressing renewable and alternative energy forums as a keynote speaker, General Clark's comments often focus on the national security implications of the United States' foreign oil dependence and the U.S. Agriculture industry role in providing alternative energy sources. In early 2011, he drew a record crowd in the "Be Ready Discussion Series" at Ag Connect Expo. *"In the agricultural business, you are the most productive sector of America. You're the sector that made America great,"* he declared. *"Now we've got to take that productivity out of agriculture and move it to the next level. And that is to produce a liquid fuel that will free us from dependence on imported oil in the near term."* These educational discussions brought together leading experts from both inside and outside the agriculture industry with a variety of unique perspectives on key issues likely to impact future production.

"We are very pleased that General Clark has joined our team. He will be a key advisor to our group," said John Bickel, DyneGroup CEO. *"His understanding of strategic vulnerabilities related to foreign oil dependence and his belief that new, alternative engines and fuels will power the future is in line with our business plans and the technologies that we are actively taking into the alternative energy marketplace."*

DyneGroup was formed in 2009 to provide leadership to take new alternative energy technologies from laboratory to market. Its current brand portfolio includes the development of processes that will produce cost-effective anhydrous ammonia through a revolutionary green technology, the production of internal combustion engines that will

2-2-2

operate on alternative fuels, and the provision of cost-effective, **localized** integrated solutions via private electrical power systems and micro-grids.

About Wesley Clark

Wesley K. Clark is a businessman, educator, writer and commentator.

General Clark serves as Chairman and CEO of Wesley K. Clark & Associates, a strategic consulting firm; Chairman of investment bank Rodman & Renshaw; Co-Chairman of Growth Energy; senior fellow at UCLA's Burkle Center for International Relations; Chairman of Clean Terra, Inc.; Director of International Crisis Group; Chairman of City Year Little Rock; as well as numerous corporate boards. General Clark has authored three books and serves as a member of the Clinton Global Initiative's Energy & Climate Change Advisory Board, and ACORE's Advisory Board.

Clark retired a four star general after 38 years in the United States Army. He graduated first in his class at West Point and completed degrees in Philosophy, Politics and Economics at Oxford University (B.A. and M.A.) as a Rhodes Scholar. While serving in Vietnam, he commanded an infantry company in combat, where he was severely wounded and evacuated home on a stretcher. He later commanded at the battalion, brigade and division level, and served in a number of significant staff positions, including service as the Director Strategic Plans and Policy (J-5). In his last assignment as Supreme Allied Commander Europe he led NATO forces to victory in Operation Allied Force, saving 1.5 million Albanians from ethnic cleansing.

His awards include the Presidential Medal of Freedom, Defense Distinguished Service Medal (five awards), Silver star, bronze star, purple heart, honorary knighthoods from the British and Dutch governments, and numerous other awards from other governments, including award of Commander of the Legion of Honor (France).

About DyneGroup

DyneGroup provides alternative energy solutions by developing pragmatic steps and combined services to address and resolve issues in world-wide food, fuel and electricity vulnerabilities. The founders of DyneGroup believe that this effort could potentially represent cornerstone opportunities, embedded within a more comprehensive economic growth strategy, based on green energy technology and micro-grid development. The ultimate goal is to provide localized control over commodities (fuel, fertilizer, and electricity) vital to national and international livelihood and sustainability.

DyneGroup provides the integration of **multiple technologies** that advance *innovation* across the alternative energy spectrum. The DyneGroup portfolio of new technologies works closely with the additional resources, knowledge base and talents provided by key professional associates. This collaboration allows DyneGroup brands to deliver the *right* distributed solutions - customized for each specific end-use, while having significant impact on local economic development efforts - with the ultimate goal of making *alternative* energy a viable reality in the world marketplace.
