

# Compostable Sushi Trays

## Made from Ingeo™ – a NatureWorks® biopolymer

These sturdy black sushi trays and matching lids are derived from renewable, plant-based resources. Providing an alternative to the standard petroleum based containers so often used by sushi chefs at sushi bars, delicatessens, supermarkets, grocery stores, cafeterias, and restaurants. The trays and lids are 100% compostable, at municipal or managed compost facilities that accept Ingeo or polylactic acid (PLA) material.

Made entirely from NatureWorks® Ingeo™ biopolymer these trays look, feel and function the same as the plastic variety, without the damaging environmental impact. The crystal clear lids show off the freshness and skill that goes into sushi making.

- **Crystal-clear lids for maximum food visibility.**
- **Made from a “natural plastic” that performs as well as petroleum-based products.**
- **Produced with sustainable, annually renewable resources.**
- **Meets FDA guidelines for food contact surfaces.**

Item #	Description	Inner Pack	Case Pack
