Oilmen's celebrates 60 Years and 6,000 square foot expansion with Open House.

SPARTANBURG, SC — Oilmen's Equipment Corp, parent company of Oilmen's Truck Tanks, celebrated its 60th Anniversary today with an Open House at their corporate headquarters in Spartanburg, SC. Oilmen's invited customers, vendors, and community members to join their employees for a southern-style BBQ lunch.

Attendees were greeted at the Parts Counter and paired with long-time employees who gave tours of the three main companies (OEC Fluid Handling, OEC Petroleum Systems, and Oilmen's Truck Tanks) on the way to the vendor exhibit area. OEC Fluid Handling featured its shop on the tour and had several base mounted pumps on-site as well as bulk storage tanks for diesel exhaust fluid on display in the parking lot. OEC Petroleum Systems displayed pictures of recently completed commercial and retail fueling sites. Oilmen's Truck Tanks had units in various stages of the manufacturing process, positioned from start to finish, to give guests an in-depth look at how a tank truck is assembled.

Lunch was served in the recently completed 6,000 square foot expansion. Attendees enjoyed meeting representatives from Balcrank, Blackmer, Betts, Civacon, DAB Leader Pump, Dieghan Equipment, Dixon Valve, Emco Wheaton, Flux Pumps, GoodYear, Hannay, Husky, Jefferson Valve, Liquid Controls, Micro-Matic, MP Pumps, Muncie Power, and OPW. Also, parked outside were the latest chassis by Peterbilt, Freightliner, Kenworth, and Western Star.

Guests were given the opportunity to have their picture taken in the restored 1920's mule-drawn oil wagon. The oil wagon, previously a fixture at many state and industry trade shows, had been retired several years ago after it was damaged in an off-site fire. Piedmont Truck Paint Services, another division of Oilmen's, meticulously restored the unit for this special event.

Oilmen's 80,000 square foot plant with new expansion sits on a 25-acre site.

About Oilmen's

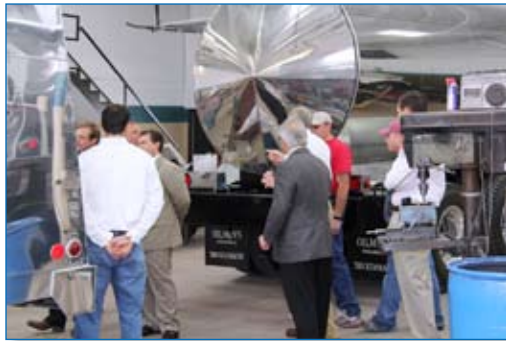

Oilmen's is a family owned and operated company of approximately 100 employees. Oilmen's was started in 1945, but was not incorporated until 1951. The original company was located in a building less than ¼ mile from the current facility that was built in 1980. The current building has seen 6 expansions, the latest of which added 8 bays to the Truck Tank weld shop.

OEC Fluid Handling is a distributor for pumps, meters, and process controls to the pharmaceutical, chemical, food, and plastic industries. OEC Fluid Handling has sales offices in Charlotte and Greensboro, NC in addition to the one in Spartanburg, SC. OEC Fluid Handling has bulk DEF tanks available for shipment nationally.

Oilmen's Truck Tanks assembles fuel, lubricant, waste oil, DEF, water, and other specialty pumping trucks and ships them worldwide. Oilmen's maintains an inventory in excess of \$6 million and operates a fully stocked Parts Counter with parts ready to ship same day.
