ggo

REVIEW-READY

ESI Processing Service
Fixed Fee Pricing - $20 to $100 per GB

High Performance Processing

GGO provides fast accurate ESI processing in compliance with the EDRM standards and delivers the following results within the Processing and Analytics phases of e-discovery:

- **Inspect:** Initial assessment of collected data
- **Process:**, normalize and organize over 500 types of collected file types
- **De-NIST:** Remove system, OS and other non-data content
- **Triage:** Resolve challenges posed by encrypted, password protected or corrupt files
- **Index**: Organizes content for optimal search in the review phase
- **Filter:** Apply search terms and filters, report results
- **Advanced Analytics**: advanced searches, filters, reports support case assessment and further reduce document volumes for the review phase
- **Load File:** compatible with any e-discovery review application
- **Custom Load File:** deliver a load file matching your specifications

Rapid Turnaround

- **48-Hour Delivery:** High-volume capacity gets you to 'review-ready' quickly

Any Data Type   *Any* Platform

Start with data from any source:
Collected by client
Collected by Service Provider
Collected by GGO

Deliver review-ready documents and Load file:
Fully compliant with manufacturers' specifications. GGO can also create custom file formats to your specification.

Expert Inspection and Advisory Service

- Each document collection processed by GGO receives an expert assessment by our e-discovery consultant. Inspection results are provided to the client, along with alternatives for dealing with atypical or problematic content.

Standard Processing Features

- Initial checklist review assures that requirements are clearly understood and communicated.
- Receipt of collected ESI on client-provided media or uploaded via FTP
- Processing complete within 36 hours of receipt of data by GGO
- Processing for over 500 file types, including Lotus Notes, Exchange e-Mail, business data files, compressed and container files, and web content.
- Full Unicode compliance accurately processes content from over 70 foreign languages, including Chinese, Japanese, Korean, Arabic, and Cyrillic.
- De-duplication within custodian or across the entire data set.
- Application of filters by date, domain, document type, custodian, or any metadata fields
- Retention of family group relationships, attachments and embedded content
- E-mail threads make conversations viewable (if supported) in document review
- Complete processing report, outlining all processes, searches, and decisions, and accounting for the resulting production set.

Fixed Fee Processing

Traditional service providers base processing fees on the GB volume of data. Rates range from $100 to $500 per GB, for processing, based on the original volume of collected data.
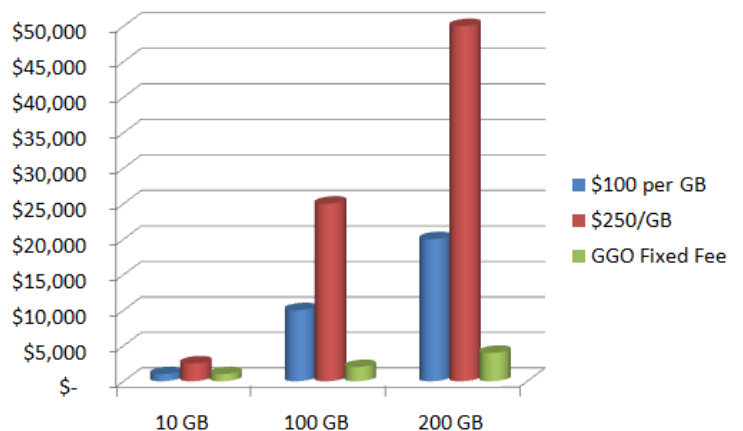

Other Processing Services: up to $500/GB
GGO processing: As low as *$20 per GB*

GGO prices are based on collection size:
1-10 GB: $1000.
10-100GB: $2000.

Legend:
- $100 per GB
- $250/GB
- GGO Fixed Fee

Fixed Fee Processing realizes significant cost reduction over volume-based processing fees.

Technology Expertise Industry Leadership

The team at GGO, with the Digital WarRoom e-discovery platform, is changing the way the world thinks about value in e-discovery solutions.

At the root of the GGO value proposition is a strong belief that well-designed technology can be accessible, affordable, and easy to use for all legal professionals.
