- Onsite supervision to assure correct installation
- Operations training by Jensen Precast technicians for contractor and/or owner

SYSTEM WARRANTY

- One source for warranty claims
- Covers all system components for one year after start up
- Extended warranty packages available

WHAT OUR CUSTOMERS SAY ABOUT THE JENSEN PRECAST PUMP & LIFT DIVISION:

"I highly recommend the Pump & Lift division of Jensen Precast. They provide excellent design services at no cost to the developer. Client revisions are quickly incorporated into the design by Jensen Precast's design team so plans and specifications can be returned to the developer without delay. Unit pricing is supplied as part of the design process allowing the developer to determine the cost immediately."

— Guy Morris, P.E., LEED AP. Principal, Lochsa Engineering, Las Vegas, NV

"The cost effectiveness of the precast pump station design and quick responsiveness of your design team was very helpful during our design process. Your team was very patient with all the changes I threw at them with almost no warning and a short time line." — Gidti Ludesirishoti. HDR Irvine, CA

Jensen Precast is among the largest independently owned precast concrete companies in the United States. Since 1968, we have grown our business through successful relationships between the contractors we sell to, the engineers who specify us, and the communities which use our products.

We design and manufacture standard and custom precast concrete products to meet infrastructure needs for electric, gas, water, and telecom utility distribution, as well as highway construction, retaining walls, wastewater, stormwater, and sewer applications.
