

We Believe In Humble Understatement and Over the Top Delivery

Our customers are always asked if we overstate or understate the project? 100% have said we drastically understate without a doubt and that the views are far more amazing than they ever imagined. They are blown away with over ten miles of beach just minutes away and cannot believe that 200 yards above sea level can produce a dry arid climate with a light cool breeze 90% of the time. We enjoy 8 to 9 months of wonderful weather and a light rainy season.

Imagine sleeping next to the ocean with no air conditioner. Or enjoying the ocean breeze (and view) from your roof without so much as a drop of perspiration in even the hottest of months. Sit and listen in this beautiful stillness to waves crashing on the beach, macaws flying by, or flocks of green parrots buzzing overhead. Almost every morning a pair of Tucans drop in the park to say, "Hi," and just today 2 Scarlet Macaws spent the afternoon feeding 15 feet away from an owners' home.

Hauler monkeys come every morning

at 5 am and at 5 pm to feed on the banana trees in our parks. They roar and make you feel like you could be nowhere else but Costa Rica. No loud car horns or mufflers... No smog and smells of jet fuel and burning gasoline. Just you and nature. We see deer on a regular basis in our own green parks, as well as white face monkeys with babies on their back twice a year.

Why So Inexpensive?

We eliminate the middle man. There are no real estate or mortgage fees to pay or contend with... We build the homes, we sell the homes, we finance the homes. When you purchase a home in Costa Rica, you are purchasing a lifestyle. A lifestyle free of worry and stress. Our transactions suit that lifestyle perfectly. We have worked hard and spent a lot of money to ensure that we can deliver the highest quality and reliability at the most reasonable price.

Our houses surpass all Costa Rica standards, using top-shelf engineers, high-quality green-mined sewage systems, and foundation poured over bedrock. We have many homes standing for over two years with not even a hairline crack visible. When you buy from Bajamar Hill Ltd., you are paying bargain prices because we work HARD to buy and build projects at the lowest price possible to still turn a small profit and stay in business. We are doing what we love to provide you with what you will love.

Many other projects in the area were started back when property values were high and waste was no problem. In today's economy, waste is not an option. This project has been the best-kept secret in Costa Rica and now you are one of the special few to get the opportunity to get in on it.

Past sales were made from word-of-mouth and we can boast a 90% closing rate. Even better, the majority of owners have purchased multiple lots, in several cases coming back a year later after searching for a better deal just to buy more units as investment properties.
