

GREEN PATH TRANSFERS

www.greenpathtransfers.com

Who is Green Path Transfers?

Green Path Transfers is a new, global ground transportation business. We offer airport and city-to-city transfers with an eco-friendly focus, and on a global scale – we currently have over 150 cities contracted globally, and are expecting 250+ by the end of 2011. Green Path Transfers allows customers to book transfer vehicles using “green technologies” where available, such as hybrids, electric cars, and biofuels, as well as automatically offsetting 100% of carbon emissions generated by the transfers.

Features & Benefits:

- Focused on the growing eco-friendly sector of the ground transportation market
- Instantly bookable up to 24 hours prior to departure
- Competitive pricing
- Growing network of destinations around the globe
- One central point of contact for contracting and invoicing
- Very attractive rates of commission for agents and affiliate partners
- XMLAPI, booking widget, banners and direct link affiliate options all available
- Integration with GDS (Sabre, Amadeus & Galileo) and alternate GDS (Multicom, Comtec, etc) soon available

The Bigger Family

Green Path Transfers is a subsidiary company of the WHL Group.

WHL Group is the largest local-travel network in the world. Originally started in 2002 as a pilot project of the IFC (World Bank Group), it was spun off as a private company in 2006 and has since grown into a franchise network of various award-winning travel companies present in more than 100 countries.

All of WHL Group's companies help travellers find unique ways to experience a destination through local tourism professionals. WHL Group companies empower local partners who have practice in experiential and mindful travel and a local's knack for identifying, explaining and sustaining the distinctive qualities of a place.

Our commitment to Carbon Offsetting/Going Green

Green Path Transfers:

- Encourages the uptake of lower carbon transfer options by providing a financial incentive to local partners to seek out such options.
- Places significant emphasis and focus on partnering with transfer companies already using low carbon emission vehicles.
- Provides incentives (financial and otherwise) to all partners to begin switching their fleet over to any lower carbon options available to them.
- Give prominence on our main web site to low carbon options being used within the network. This includes everything from hybrids and biofuels, to liquified gas, ethanol and electric vehicles.
- Run a feed across all web sites in the network displaying innovations in green living, with a special emphasis on transportation.
- Build affiliations with groups globally involved in responsible and sustainable travel.
- Work with carbon offset partners (such as Blue Ventures Carbon Offsets and Atmosfair) to try and support innovations in low carbon transport in the countries we are servicing.
- Work with whl.travel and other WHL Group companies to make all operations of the company carbon neutral by both minimising our own carbon footprint and offsetting that which we cannot avoid.
- Have a stated aim of having the majority (>50%) of Green Path partners globally using low carbon emission vehicles by 2020. We expect this figure to be significantly higher in developed destinations (such as Europe and North America), where low carbon-emission vehicles are much more readily available.

The WHL Group is committed to sustainable and responsible tourism. In the case of Green Path Transfers, this involves all of our transfers being 100% carbon offset. Being the first global transfer company to offer 100% carbon offsetting built into the transfer price is a key differentiator for Green Path Transfers in the marketplace.
