

Advanced Continuous Monitoring System (ACMS) for SiteMinder provides visibility, analysis and monitoring of CA SiteMinder providing an affordable cloud-based solution for any business. The service provides a low cost entry point allowing for: no infrastructure investment, rapid deployment, no maintenance fees or mandatory software updates, and on-demand availability from anywhere at any time.

ACMS cloud service provides security intelligence to simplify management of CA SiteMinder. ACMS employs continuous situational awareness and real-time data analysis features to assist support staffs with operations by recording key native SiteMinder security data, including:

- ✓ Policies and User Store
- ✓ Performance Metrics
- ✓ User, Administrative and System Activities

Customers using ACMS for SiteMinder are able to accomplish more by saving time, money and resources. Existing staff can interact with experts and benefit from their years of field experience working with SiteMinder. Compliance audits, assessments and solutions for daily issues may be streamlined.

- ✓ Troubleshooting of daily problems
- ✓ Forensic security analysis
- ✓ Trending analysis for changes
- ✓ Reporting for security assessments or audits
- ✓ Information security governance, risk and compliance enablement

ACMS provides the quick to deploy, easy to use, flexible, extensible, and comprehensive solution required for any business using SiteMinder. It is an enabling service that can be used by companies of all sizes that want a solution to meet the challenges of more complex web infrastructure.

A&I's Advanced Continuous monitor systems offers customers the flexibility to use the system on site fully licensed, as a managed service or as complete cloud service. ACMS is powered by IdentityLogix's SpyLogix state-of-the-art security middleware.

Key Features

***Ease of Analytics:** Provides an easy to use interactive console that enhances security intelligence visibility by providing an intuitive console allowing for rapid querying and analysis of large amounts of data. You have access to your security data to be viewed and analyzed historically or in real-time.

***Ease of Reporting:** Configure on demand reports as granular as you need and see them in real time or schedule them at your convenience. You have access to our team of SiteMinder experts to you.

***Minimize Risk:** Get to know where your security loopholes are for a fraction of the cost of other solutions.

***Simple export options:** All views can be easily saved as a PDF file, exported to Excel, or output in other popular formats for sharing with other applications such as your favorite report writer.

***Alerts:** Receive alerts using popular communication technologies such as email or RSS. Specialist can assist in review and setup alerts that meet your monitoring requirements.

***Rapid Deployment:** Whether on-site or in the cloud, ACMS deploys easily and rapidly.

"At A&I we believe that integration should be simple and painless- which means: No Appliances. No Coding. No Hassle! IdLogix helps us achieve this critical enterprise goal."

-John Balsavage
