

FOR IMMEDIATE RELEASE

Wintellect co-founders, technical director named Microsoft MVPs

(Knoxville, Tenn.) – January 31, 2012 -- Wintellect, a consulting, debugging and training firm specializing in Microsoft Windows and .NET technologies, today announced that four of its consultants/instructors were awarded the Microsoft Most Valuable Professional (MVP) designation. The Microsoft MVP award is given to exceptional technical community leaders who actively engage and share their high-quality, real-world expertise with others in their local online and offline communities.

Receiving the designation as Visual Developer – Visual C# MVPs are Wintellect co-founders John Robbins and Jeffrey Richter; co-founder Jeff Prosise was named a Silverlight MVP; and Steven Porter was named Client Application Development – Architect MVP.

"We are so proud of our team members for all their achievements at both Wintellect and in the technical community," says Wintellect's President and CEO Lewis Frazer III. "The personal drive, technical expertise, community involvement, and most importantly the passion they exude is an inspiration to everyone at Wintellect and we commend them for this prestigious award."

The 2012 MVP awardees join Wintellect Project Manager and Senior Consultant, Jeremy Likness, who was named The Microsoft Silverlight MVP of Year in June of 2011.

Starting more than 10 years ago, the Microsoft MVP program is based on comprehensive, worldwide community feedback. Potential MVPs are nominated by other technical community members, current and former MVPs, and Microsoft personnel who have noted their leadership and their willingness and ability to help others make the most of their Microsoft technology.

About Wintellect

Wintellect is a consulting, debugging, and training firm dedicated to helping companies build better software, faster through a concentration on .NET and Windows development. Our offerings include full lifecycle application development; architecture, analysis and design services; UI/UX design; project management; debugging and performance tuning; database design and development; as well as in-depth, multi-day .NET on-site and open enrollment training. We also host Devscovery Conferences, our premier three-day, multi-track training conference geared toward the intermediate to advanced developer. For more information about Wintellect, visit <u>www.wintellect.com</u>.
