Trailer Adhesives

Most trailers of all types and sizes require certain tapes and adhesives to maintain both legal and safety qualifications. These range from DOT Conspicuity Tape, Anti-Slip Adhesives, Reflective Vinyl Logos and more.

Adhesives and Accessories

- **DOT Conspicuity Tape** - The Federal Motor Carrier Safety Administration (FMCSA) regulates the use of conspicuity materials on semitractors and semitrailers. Manufacturers may equip their trailers with red/white materials, as well as yellow reflective tape strips. The reflective material must have certification markings and be placed in compliance with the FMCSA.

- **Vinyl Logos** - Great for company recognition day or night. Often attached to smooth vehicle or trailer surfaces and can be custom designed to suit your corporate logo or artwork. Reflective Vinyl Logos are excellent for night time recognition and have a few advantages: Highly visible for after dark advertising, long lasting premium vinyl, safety benefits for trailers to be visible at night, best solution for public signs that need to be visible at night.

- **Anti-Slip & Gravel Guard** - Make your trailer and yourself safer from slips and falls in walk-through areas by customizing it with top of the line anti-slip and nonskid tape. AFT also offers long lasting gravel guards in many different styles to suit your trailers design and structure.
