

## Not all wireless recycling companies are equal.

From the beginning, e-Cycle was designed to meet the specific sustainability and data security challenges that leading enterprises face. **e-Cycle is the first wireless mobile buyback and recycling company in the world to achieve e-Stewards® Certification.** e-Cycle adheres to the highest global standards of environmental protection, data security, and worker safety.

### RECYCLE: Free recycling and e-Stewards® Certified environmental protection

- We recycle your end-of-life wireless devices and accessories at no charge.
- e-Stewards® and R2 Certified - e-Cycle upholds the highest global standards for the BAN global certification and adheres to the highest level of environmental responsibility and worker protection. As part of e-Stewards, e-Cycle is ISO 14001 Certified.
- Zero Landfill Policy – All devices and accessories that are unable to be reused are shredded on-site and sent to reclaim the materials and keep harmful toxic e-waste out of our landfills. We annually audit all of our downstream vendors to prohibit the export of e-waste overseas.
- Environmental Impact Statement – At your request, e-Cycle provides a quarterly statement reflecting the positive impact that your organization is making on the environment through your wireless recycling program.

### RECOVER: Turnkey wireless asset recovery

- We provide a simple program to purchase your used wireless devices, put money back into your telecom budget and improve your bottom line.
- Account managers across the U.S. offering 24/7 personal support.
- Complimentary FedEx shipping of devices.
- Fast processing and quick payments.
- Tracking, auditing and accounting of mobile assets.

### PROTECT: Rigorous, industry-leading data protection

- Complete data sanitizing on all devices, including hidden menus that still may contain sensitive information—even after resetting to the factory default.
- Random sample forensic testing of devices.
- A thorough verification audit on every device for quality assurance.
- Testing for active lines which pose a serious security risk and can result in substantial financial loss due to unnecessary carrier service charges.
- We adhere to all U.S. Department of Defense Directives for scrubbing BlackBerrys.
- We complete HIPAA Title 45 CFT Part 164 security standards for our healthcare clients.
- On-site SIM and external memory card micro-shredding.
- High-security, limited-access facility and employee background screenings.
- An e-Cycle Certificate of Data Destruction provided upon request.
