

# The answer is yes.

**Have you noticed how much of life is in "The Cloud"?**

**Wondering if it's time to move your desktops and servers there as well?**

You may be a non-profit or a business, but your IT network must move to the cloud to stay in the game. To survive and thrive, your organization's systems need to be available from anywhere, anytime, on any device. You need to reduce costs & keep up with technology. You need to boost productivity and enable innovation.

Meet the technology that's changing the way business is done. Meet **Your Cloud Pilots®**. **Your Cloud Pilots®** technology solution frees organizations of all sizes and sectors from costly technology overheads.

Your employees' virtual desktops are available with all emails, files, and applications via a remote server rather than individual PCs. This allows your employees to log into the same fast and familiar environment from any internet-enabled device, anywhere, anytime. Further, our solution protects your virtual desktops from viruses and other cyber threats, and performs daily backups of your sensitive data.

The time is now. **Your Cloud Pilots®** is ready to help you move your IT function to the cloud. Contact us today to discuss just how easy innovation can be.
