S Q U A R² E D

In today's enforcement-heavy environment, the risks associated with compliance lapses have never been more significant. Federal enforcers are now targeting for *criminal* prosecution both the corporations and their employees and officers. It is getting personal and the stakes are high.

Companies, their legal counsel, and Compliance Officers turn to R-Squared when they need to evidence *effective* compliance. Our focus is evidence-based compliance, and our services and solutions are designed to prevent lapses and enforce policies. We ascribe to the rule that compliance is a by-product of sound business practices. We design solutions (manual and technical) that fit within the fabric of the operation—compliance that works *for* and not against the company.

Our People
Subject Matter Experts: R-Squared's highly recognized SME's have over 50 years combined, in-the-trenches legal and compliance experience. Our consultants include former law partners, Office of Inspector General (OIG) lawyers, accrediting organization surveyors, and Compliance Officers from hospital, health system, and medical equipment providers and health plan, pharmaceutical and medical device manufacturer organizations.

Technology: The R-Squared Technology Team has more than 20 years of innovative leadership in the management and development of high performing, results-oriented information technology solutions for life sciences organizations.

Our Solutions
In addition to our consulting services, we have developed the **RADS® Compliance Platform**, which is the industry leading platform for the management of today's complex compliance operations. Indeed, R-Squared has become the "go to" partner when companies need to evidence compliance with government-imposed integrity requirements.

Expert advice. Powerful solutions. Iron-clad compliance.

Our solutions include:

RADS® SpendTracker®

SpendTracker® is a compliance solution designed *expressly* for "aggregate spend compliance." It collects, tracks, applies business rules and workflows, and creates all needed reports, while generating solid evidence of your compliance at the same time. **SpendTracker®** has flexible master data management capabilities, includes the NPI and state databases, and can interface seamlessly with existing and purchased third-party data sets.

RADS® Arrangements Keeper®

Arrangements Keeper® is described as the industry leading software for the management of contractual relationships with physicians and other referral sources. This solution *substantially* mitigates anti-kickback and FCPA risks and exposure. The module provides real-time data of affiliations, potential conflicts, fair market value, consulting needs, time sheet and deliverable compliance, and interfaces with enterprise AP systems for full end-to-end event and arrangement management. This solution is or has been used to satisfy significant aspects of DPAs and several CIAs.

RADS® Grants Keeper℠

Grant Keeper℠ automates the intake, review, approval, communications, and follow up on all types of grants and grant requests. **Grant Keeper℠** includes pre-configured, but fully customizable, online grant request forms. It automatically routes completed requests to designated reviewers and allows for remote review, scoring, and/or approval of grant requests. The solution creates grant agreements, has digital signature capabilities, provides for full reconciliation of proposed and actual event budgets, and otherwise monitors grant agreement compliance.

RADS® Conflict of Interest Management System℠

Conflict of Interest Management System (CIMS℠) facilitates electronic dissemination (scheduled or as needed), completion, management, and storage of tailored Conflict of Interest/Financial Disclosure Statements. Authorized users may check completion status, and sort and report on the statements by clinical study, physician, product, noted conflicts/relationships, and other data points. All Statements are stored centrally for easy search and retrieval. Facilitate compliance with 21 C.F.R. Part 54 requirements.
