

**Ez2<sup>®</sup> Rotary Action File**

***datum***

# Take it for a spin...

What comes in a rectangular cabinet, spins 360°, and changes cluttered storage spaces into organized cabinets of wonder? No, it's not the latest office superhero, it's the Ez2® Rotary Action File.

Okay, so maybe it is a bit of a superhero. After all, it has some amazing features that make it a great solution for nearly any storage situation, regardless of what you're storing.

Don't believe us? See for yourself.

## You want to store what?

No matter if you're storing binders and folders or wine bottles and your Kenny G collection. We can configure the Ez2® to hold just about anything. It can come equipped with shelves for miscellaneous storage, multimedia drawers for everything from CDs to paper clips, and large storage drawers for everything else.

## It's in the wall.

Like a magical doorway to filing paradise, the Ez2® can be installed in a well for the ultimate in space savings.

Since the unit rotates 360°, the back of the unit doesn't need to be accessible in order to get to everything being stored in the unit.

This feature also make it a great room divider. Put in between room in the same department and use it for shared file storage. Or use it to divide up different departments and utilize the locking feature to allow only one side to be accessible to it's respective department.

McNees Wallace & Nurick LLC installations of Ez2® Systems on several floors of the building to store legal materials in large file folders.

# Sure, we can do that...

No matter what the application or where the installation, we can find a way to make you happy. Really. We won't shy away from custom work, we welcome it with open arms.

Take this installation for example. Seems pretty simple, right? A couple of 7 high Ez2® units filled with file folders. No big deal.

Except to the customer it was a bid deal. They wanted rotary units that could be sat back to back to maximize their floor space usage. They wanted pull-out reference shelves that didn't snag on the underlying folders. And they wanted a bunch of units, on several floors, in a color that was cohesive with their current interior design. Done, done, and done.

Want to learn more about the work that we do? Visit our case studies section on the web.

# Compare and contrast.

When it comes to our Ez2® Rotary Action File, we feel that no one can compare to what we've created. Not in style, functionality, affordability, convenience... you name it, we think Ez2® will give you the best bang for your buck.

Check out these stats and decide for yourself.

## No foot pedal, no problem.

Our Ez2® units don't require a foot pedal to rotate them. What does this mean? Well, not only are our units easier to use, but it means they require less floor space. No foot pedal means a smaller footprint and it eliminates a tripping hazard.

Expands easily to either side!

### We don't call it "Ez" for nothing.

If you run out of storage and need to add more, it expands to either side with the simple addition of a new unit.

It can lock it all 4 positions for convenient usage and security.

Use it from either side. This handy function makes it ideal for a room divider.

No matter how you look at it, our Ez2<sup>®</sup> really does live up to its name.
