

## **7notes announced winner of the R25 “Best Business Android Application” award**

**Tokyo, Japan, February 14, 2012**

7knowledge Corporation, an innovative productivity application developer for tablet and smartphone devices, and its parent company MetaMoJi Corporation are proud to announce that 7notes with Mazec for Android has been selected as “Best Business Android Application” in the recent R25 awards.

“7notes changes the way that people interact with their smart phones and tablet devices, socially and for business.” said Kaz Ukigawa, the CEO of 7knowledge. “Android smart phones and tablet devices can be used to enable a better customer experience, to streamline paper oriented processes, and to reduce risks within document management.”

The R25 judges selected 7notes with Mazec for Android as the winning app due to its outstanding usability and effectiveness as a note taking tool. 7notes was also described as the “coolest app for business people”, having enabled users to utilize their Android smart-phones and tablets in innovative ways to benefit their organizations.

7notes with Mazec for Android gives its users the capability to:

- Capture ideas and take notes quickly and accurately
- Utilize the advanced 7notes handwriting recognition engine - “Mazec”
- Share notes through E-mail, Evernote, Facebook and Twitter
- Add a handwriting input window to any Android application

The 7notes proprietary state-of-the-art handwriting recognition engine allows users to take notes on the go, using their fingers or a pen, and easily switch between handwriting and keyboard entry with a single touch. Notes can be saved as different formats and stored or shared through Dropbox and Evernote.

The Android version of 7notes also expands the device’s input capabilities to include handwriting recognition via its Mazec technology. The Mazec window can be selectively displayed instead of the regular software keyboard, adding handwriting recognition and the 7notes prediction engine into any installed applications. Web applications also benefit from the Mazec window through the standard browser installed on the Android device.

7Knowledge are committed to continue developing innovative solutions to help eliminate the barriers between smart-phone users and their keyboards.

If you would like more information on how use 7notes to benefit your organization, or to enhance an existing solution or product, then please contact us via telephone at +1-631-244-1466 or visit our website for more information and contact options.
