

Crisalix e-Stetix[®]

A New Era in Plastic Surgery Consultation with Fully Interactive Web-Based 3D Simulation.

Clinics around the world rely on Crisalix e-Stetix for increased patient referrals and exponentially higher consult-to-surgery conversion rates.

Intuitive and Cost Effective

The fully interactive, web-based 3D simulation from Crisalix is changing the way physicians think about attracting new patients and accurately simulating realistic surgical expectations. [Generate interactive 3D models with the patient in less than 5 minutes](#), and do so at a fraction of the price of expensive scanner based systems.

Perfecting the Consult

At [Crisalix](#), we manage the technology, freeing up your valuable time to focus on patient satisfaction. State-of-the-art technology from Crisalix enhances the patient's confidence level and establishes realistic patient expectations. Simply select the desired implant and resulting figure based upon the patient's actual physical images.

Our advanced "cloud" solution means no software or hardware to buy, and no obsolescence, ever! All you need is an Internet connection, any standard 2D digital camera and three patient photos. [Crisalix](#) does the rest; fully interactive 3D views accurately portray before and after images for virtually any breast implant augmentation.

The New Patient Consultation Era

[Crisalix](#) provides the most productive tool for your practice while generating additional income, freeing up office space, and positioning you for the future. In addition to being continuously updated with all manufacturers' breast implant configurations, Crisalix e-Stetix offers five different subscription plans, to meet every practitioner's need.

[Crisalix](#) is a game changer - Never before have plastic surgeons enjoyed such an epic tool to elevate their practices to a new level for attracting, engaging and satisfying patients.

The clear choice for [interactive 3D simulations](#) that makes the [most of every opportunity](#).

3D Simulations

"It is very exciting to a plastic surgeon from anywhere in the world! You take three photographs and within 5 minutes, you receive a significant sophisticated 3D simulation."

Thomas Biggs, Editor-in-chief's
IPRAS Journal.

About Crisalix

Crisalix is a spin-off from two of the world's most renowned university research institutes in biomechanics, 3D imaging and information technology in Switzerland.

With over five years of dedicated development that included extensive testing by hundreds of surgeons of its state-of-the-art technology prior to commercial launch in August 2010, **Crisalix has customers in 20+ countries**. Notable customers and medical board members include Drs. Jan Poëll (ISAPS President), Yves-Gereard Illouz (inventor of liposuction) and many more.

Crisalix..."How did we ever manage without it?"

Test for FREE with your 2 next patients!

- Go to www.crisalix.com and select the Free trial button.
- Get trained by our 24h/7d technical support desk for FREE.
- Enjoy e-Stetix!
