

Market Survey by Ontario Based Company Indicates Bright Future in the Market for [Nokia N9](#)

[Nokia N9](#) is all set to rule the global Smartphone market in the days to come, predicts Internet Marketing Services, a private market research company from Ontario. This amazing phone is yet to make its appearance in this part of the world. However, it has constantly been amongst the news.

A recently concluded market survey by Ontario based Internet Marketing Services has suggested that [Nokia N9](#) would be one of the top players in the global market for Smartphones. This extremely popular phone is still not available in Canada and the United States, but there have been enough speculations in the market about it. The research conducted by Internet Marketing Services involved a comparative analysis between different popular Smartphones in the market. Several factors like price, features, ease of use, and appearance were taken into account in this market research.

Apart from [Nokia N9](#), the company conducted its research with some other highly popular phones like Apple iPhone 4S, Samsung Galaxy S II, Nokia Lumia 800, Sony Ericsson Xperia Arc, and some more. Nokia Lumia is one of the latest models from Nokia, but N9 still has better acceptability in the market because of its 1024 MB RAM, and UMTS/GSM network that works anywhere in the world. The research by Internet Marketing Services has indicated that along with the N9 model from Nokia, Apple iPhone 4S and Samsung Galaxy S II are probably the two other phones that are most impressive amongst all.

[Nokia N9](#) was released in the market in the month of June, 2011. In spite of its limited availability across different countries, it has become one of the most popular phones ever made by any company. The phone has already received two software updates within its short life span. The Mee Go operating system used in the phone is one of its unique features. The users have also appreciated the highly sophisticated user interface of the phone. The research reveals that this model from Nokia probably has the best camera out of all phones in the market. The additional features like face detection, geo tagging, and touch focus, etc have made this model a favorite with the photographers.

About Internet Marketing Services: Internet Marketing Services is a private market research company that conducts market research on various topics. The company is based out of Ontario.
