Oxygen Software Turns 12, Offers Free Forensic Toolkit, Provides Training and Certification with Oxygen Forensic Suite 2012 Standard

On February 29th this year Oxygen Software turns 12. To celebrate its anniversary, the company updates its licensing policy, making the Standard edition of Oxygen Forensic Suite 2012 available free of charge. Under the new terms, the Standard edition of the company's flagship mobile forensic tool becomes free to all eligible customers. Customers must pass certified training in order to keep the license after the initial 6-month period. Effectively, under the current terms, certified customers will receive the right to use Oxygen Forensic Suite 2012 Standard at no charge. With training and certification, Oxygen offers forensic specialists an opportunity to obtain both the tool and skills necessary to solve forensic cases and resolve security issues.

Terms and Conditions

Oxygen Software grants Oxygen Forensic Suite 2012 Standard to all customers at no charge. In order to obtain the free license, customers must contact Oxygen Software by filling online Application Form:

<http://www.oxygen-forensic.com/en/freeware/>

Only one free license is granted per email address.

The free Standard edition is transferrable between different PCs, and may be installed on multiple workstations within a single organization.

Holders of the free Standard license can use Oxygen Forensic Suite 2012 for the initial period of 6 months. In order to extend the license for one more year, customers must take a certified Oxygen Forensic Suite 2012 course. The customers will have a choice of a local training facility. Customers passing the training will receive a full license for one more year, with the right of a free extension afterwards.

Customers passing the training will also receive a status of a Certified Oxygen Forensic Suite User, accompanied by newly issued license keys containing certification information. Certification information will be displayed in the program's main window, and will be embedded in all reports created by Oxygen Forensic Suite.

While the Standard edition of the new Oxygen Forensic Suite 2012 is available to all customers, Oxygen reserves the right to deny access to the software by its sole decision.

About Oxygen Forensic Suite 2012

Oxygen Forensic Suite 2012 helps investigators and forensic specialists access and analyze data from a variety of mobile devices such as cell phones, smartphones, communicators, PDA and tablet PCs. Currently supporting more than 3,500 different models, Oxygen Forensic Suite 2012 covers the widest range of mobile devices compared to competition, and allows fully automated acquisition and analysis of supported devices.

The unique Timeline feature offers convenient, single-place access to all activities and movements performed by the user arranged by date and time. Investigators can track user location at every moment, build and map their historic routes, and clearly see all activities performed by the user at each location.

Another signature feature of Oxygen Forensic Suite allows investigators performing a global search on all devices ever analyzed with the toolkit. The global search quickly reveals any connections (e.g. common contacts, exchanged calls, texts or emails) between the phone owners.

Oxygen's statistical analysis tools allow investigators discover social connections between the users of multiple mobile devices. Calls, text messages and Skype conversations are analyzed to produce charts and tables revealing the users' closest circle at a glance.

Oxygen Forensic Suite 2012 guarantees zero-footprint operation, leaving no traces and making no modifications to the content of the devices, making it the tool of choice among government and law enforcement agencies, security services and forensic organizations in more than fifty countries.

About Oxygen Software

Founded in 2000, Oxygen Software offers the most advanced forensic data examination tools for smartphones and mobile devices. The company is dedicated in delivering the most universal forensic solution covering the widest range of mobile devices running Symbian, Windows Mobile, Blackberry, iOS, and Android operating systems. As a result, Oxygen Forensic Suite receives great response at forensic conferences, exhibitions and trainings, and occupies a spot in the top of the list in relevant tests for extracting more data than competition.
