

MediSapien[™] for EHRs

Medical Knowledge Management Platform

Import narrative and populate fields with MediSapien[™] structured data derived from unstructured end-user dictation, transcription, and semi-structured EHRs to differentiate your ONC-certified EHR. Increase user satisfaction by requiring no change in work habits and less training. Speed implementation by requiring no customized templates. Generate revenue by offering MediSapien users an easy path to EHR or empowering your clients with dictation.

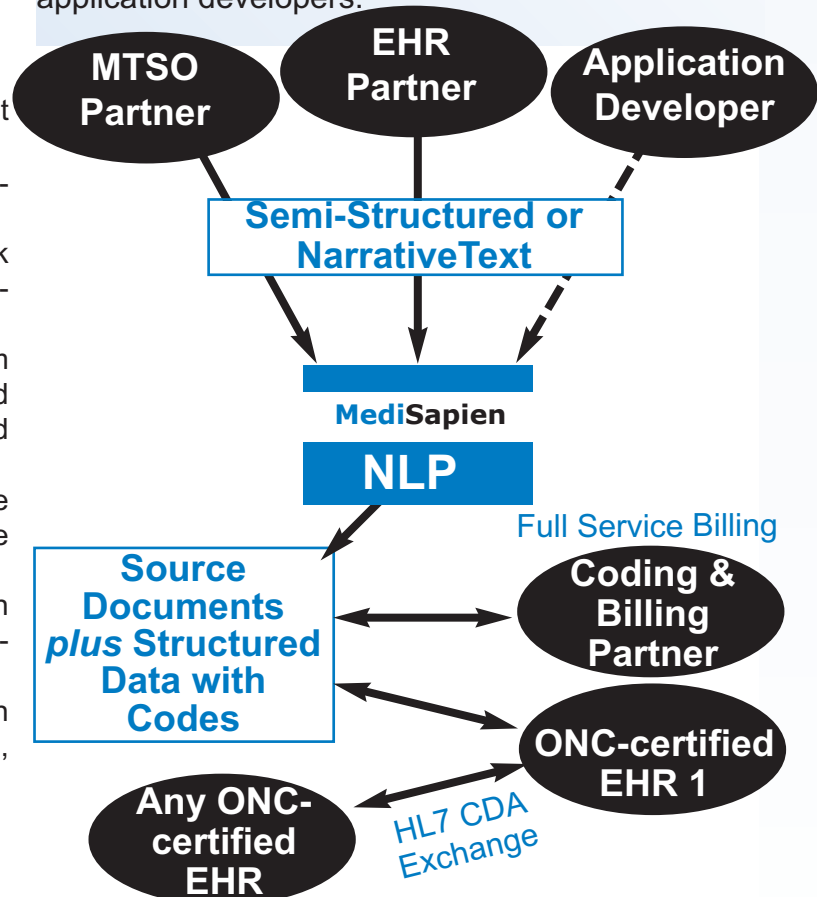

Federal incentives have spurred a dramatic increase in EHR adoption, but many health care providers have not made the move — or they are unsatisfied with their EHR. MediSapien lowers the barrier to EHR acceptance by populating EHR fields with structured data from dictation and transcription. As a MediSapien Service Partner, your company is visible to thousands of registered transcription service users, and other MediSapien partners whose clients may be ready to implement an EHR or change EHR vendors.

- Access to referrals for new business
- Solution for new clients to migrate to EHR and attest to Meaningful Use for \$44,000 (or more) incentive
- Faster implementation of your system with less training and reduced need for customized templates
- Higher end-user satisfaction with no change in work habits using dictation to capture structured EHR-ready clinical documentation
- Automated conversion of semi-structured data from other ONC-certified EHRs into narrative and structured data for insertion into your EHR and exchange with HIEs
- Ability to take existing EHR records and code the information to ICD-10 and SNOMED-CT® for future requirements
- Additional revenue earnings from transcription commission or from insertion of MediSapien information into the EHR
- Partnership opportunities with other MediSapien Service Partners for billing services, applications, and analytics

TECHNICAL OVERVIEW

- Easy integration
- Secure FTP or VPN
- HL7 CDA messaging or MediSapien API
- ADT feed for transcription client for proper I.D.
- MediSapien technical team available for support and testing or entire project

MediSapien[™] is an enterprise-class web-based platform for service partners to convert unstructured text into fully coded structured data. MediSapien accepts dictation or text from transcription vendors, legacy data and EHRs. The fully coded structured output, including ICD-10, is suitable for insertion into EHRs and facilitates interoperability. MediSapien also performs computer-assisted coding (CAC) for revenue cycle management companies, and data mining optimized for health data analytics partners. The MediSapien platform supports independent application developers.

GETTING STARTED

1. Register at www.medisapien.com or 800-546-5633 x 718
2. Schedule a webinar demonstration
3. Enroll as a MediSapien EHR Partner
