

SET YOURSELF APART WITH LUMA.

Market Your Practice

LUMA is designed with patient satisfaction in mind. Offering patients a more impressive, comfortable experience differentiates you from the competition, which means more word-of-mouth referrals and a stronger perception of your practice.

Introducing LUMA

Eyemaginations LUMA is the most innovative form of patient education and marketing software available. Driven by 3D-animated visuals and an intuitive interface, LUMA lets you present complex information to patients in an engaging, easy-to-understand manner. Use the software to differentiate your practice and drive profits.

Educate Patients

LUMA helps patients visualize your explanation and better understand their treatment options. Save time while still ensuring your recommendation comes across clearly, concisely, and persuasively.

LUMA Works for You

LUMA works where and when you need it – from the waiting room to the exam room – it is designed to fit seamlessly into your practice's existing workflow and requires little to no training.

Increase Revenue

Better educated patients make better decisions – helping you convert more prospective patients into booked cases and ensure existing patients keep coming back to your practice for follow-up visits.

With LUMA, the benefits don't end at purchase. We take pride in the idea that you're never alone – industry leading support and service come bundled with every piece of software we sell.

We can help with all aspects of setup in your office, including custom hardware consultation and support if needed. We'll make sure to resolve any questions you have before launch, ensuring a seamless experience at every turn.

Once LUMA is up and running, technical support is just a phone call away. And our subscription-based model means that you get access to updates and enhancements as soon as we release them – there's no need to devote time or resources to keeping the system up to date.

READY TO SET YOURSELF APART?
