## **PALADION EXPANDS ITS MSS OPERATION IN SOUTH EAST ASIA (SEA)**

**BENGALURU, FEBRUARY 24, 2012:** As part of its strategic growth plan and to enhance its presence in the region, Paladion Networks has recently expanded its Managed Security Services (MSS) operation across South East Asia (SEA). The expansion happened both in terms of geography as well as service wise.

Along with its local partners, Paladion has set up full-fledged operational Security Operation Centres (SOC) in Malaysia, Indonesia and Vietnam to deliver SOC services across the region. In a bid to offer better and more effective threat identification services, Paladion has also upgraded its MSS services for detection of Botnets, Rogue IPs, Trojans and Malware.

Today more and more threats are happening due to these factors and Advance Persistence Threat has become a global menace. With this advanced detection services Paladion is now all set to provide its customer better protection and business security against APT.
