

EZ Volunteer

Volunteer Management Made Easy

Volunteers Make a Difference

Volunteers are critical to student success. Research shows schools that have strong volunteer programs have higher student achievement. Parents engaged in their child's school extend learning beyond the school day. Students benefit from one-on-one mentoring when volunteers participate in school events. Schools have a stronger connection with their community and increase staff productivity.

"EZVolunteer streamlines how we register, track and recognize the contributions of our volunteers, so we're able to manage the volunteer process with fewer resources."

— Elaine Naleski, Director of Communications & Community Engagement, Colorado Spring School District 11, Colorado Springs, CO

Combining EZVolunteer with our other Online Contact Center Solutions will help you:

- Develop, maintain and share a district-wide database of volunteers
- Empower school coordinators to manage their own volunteer list
- Maintain background check results and color-code records so staff can quickly verify volunteers entering their building
- Recruit and connect volunteers to school activities
- Recognize volunteers for their time and dedication
- Compile results on volunteer hours for use in grants and award applications

EZ Volunteer is a web-based volunteer management system that streamlines your entire process from recruiting to notifying, tracking and reporting on volunteer activity in your schools.

Register Online

Encourage new volunteers to register through your website. Let them choose the schools and type of opportunities that spark their interests. They can even print the completed form to sign and return to your office.

Track Background Checks

Select a sample or all volunteers who registered in the last day or week and easily export this list for background checks, or use our automated connection to leading background services.

Schedule Opportunities

Create one-time or recurring opportunities at your schools. Select volunteers to participate based on their interests. Match volunteers to the opportunity or let them sign-up through email or through your website.

Notify Volunteers

Send emails about upcoming events and remind volunteers where and when to arrive. Attach documents or add links to web pages to provide more details about the event.

Log Hours

Record volunteer time spent in your schools, or let volunteers input their own hours. Generate reports for volunteer hours by school, activity or date range to better monitor and manage your overall program.

Sign-in On Site

Let volunteers sign-in at any school front-office with the VMS Kiosk module. The Kiosk records their hours immediately as they arrive or when they depart, removing the need to transcribe hours from volunteer time-sheets.
