

Introducing GORE® Series 500 Gasket Tape

The Latest ePTFE Technology
from Gore Sealants

Breakthrough Approach and Continuous Innovation

1996

Gore patented & introduced the multi-directionally expanded PTFE tape category.

2003

GORE® Series 300 Gasket Tape was introduced as an innovative solution specifically engineered for large steel flanges.

2012

GORE® Series 500 Gasket Tape is introduced with a recently patented technology that represents a significant breakthrough in creep resistance performance over other ePTFE gasket tapes.

Latest ePTFE Technology

- Introducing GORE® Series 500 Gasket Tape...
 - Recently patented
 - For large steel flanges
 - Highly conformable to achieve incredible tightness
 - At least 50% greater creep resistance than other ePTFE gasket tapes
 - More reliable than ever

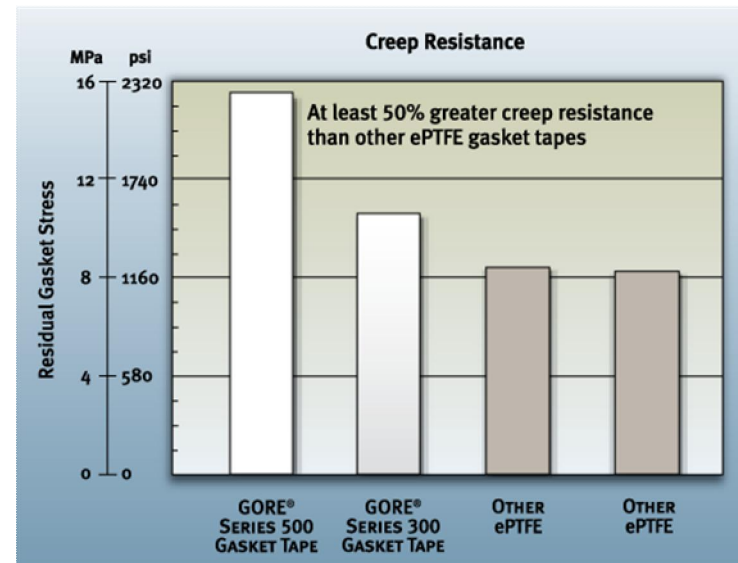

FOR INDUSTRIAL USE ONLY.

Not for use in food, drug, cosmetic or medical device manufacturing, processing, or packaging operations

Greater Creep Resistance

- Creep resistance is a gasket's ability to resist deformation during use, providing:
 - > Maximized gasket stress
 - > Retained bolt load
 - > Minimal leakage
 - > Higher reliability and performance
- GORE® Series 500 Gasket Tape – At least 50% greater creep resistance than other ePTFE gasket tapes

Creep resistance data based on EN13555 using 15mm x 3mm tape formed into a 150mm skived ring. P_{QR} values were obtained at 30 MPa initial gasket stress at 150° C.

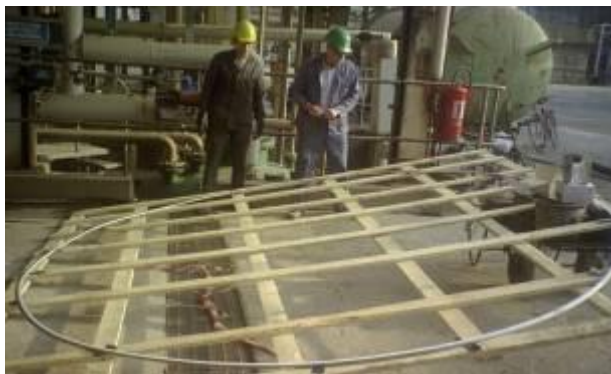

Fits Any Shape Instantly!

The unique alternative to traditional large one-piece gaskets while providing a tight and reliable seal.

Problems with large gaskets

- Custom fabrication offsite
- Excessive lead time
- Difficult to ship and store
- Costly inventory
- Difficult to install

Advantages using GORE® Series Gasket Tape

- Customization onsite
- Eliminates lead time
- Easy to ship and store
- Reduces inventory
- Quick and easy installation

Experience and Integrity

- Commitment to our Customers
 - Leader in ePTFE technology
 - Fitness-for-use dedication
 - Solving the most challenging applications for 40+ years
 - World class product and application support

Save Time, Money and Trouble

- Eliminate lengthy lead times and handling challenges by creating a gasket instantly
- Maximize production uptime and return on investment of the equipment, while reducing maintenance man-hours
- Improve overall system reliability while enhancing personnel safety
