

So what is it about **Money...** that five letter word that makes most women pull the covers over their head and want to hide?

It's THE issue that keeps most of us up at night wracked with feelings of fear, guilt, anxiety and worry. And while men have these feeling too, one thing I know for sure is women are "wired" completely differently than men to handle money.

While men want the big status symbols and the ability to provide, women on the other hand want to be surrounded with beauty, a couple of great pocket books and the ability to help others. **It's no wonder women find themselves with so much debt trying to live up to a man's standards.**

But it doesn't have to be that way. That's why **I want to teach you**, once and for all, **how to end those self sabotaging money habits** that keep you from making and keeping the kind of money you want to make in your life so you can **finally have the security you need.**
