RECESSION BUSTERS

- The best time to buy assets and property is in a recession when prices will never be cheaper
- When the going gets tough – the tough get going
- Start doing your own thing and not buy into scaremongers and doomsayers...think positive all the time
- Now is the perfect time to start a business – find a need and fill it
- Invest in yourself: put education and personal development at the top of your list
- Surround yourself with positive people who are making things happen – regardless
- Learn how to budget and economise on everything: utility bills, shopping, take-away's, coffee, train fares
- What service or product can you create that is cheaper than everyone else...people in a recession love a bargain
- 331 people in the UK are declared Insolvent or Bankrupt, EVERY DAY. If this happens to you, get a life, move on immediately – preferably sooner
