

**RHODEWAY NETWORKS SIGNS EXCLUSIVE TECHNOLOGY
LICENSING AGREEMENT WITH SMITHS DETECTION**
FirstView integrated software systems to be further developed and expanded

Middletown, RI USA – March 8, 2012 – Today, Rhodeway Networks, Inc. announced an agreement with Smiths Detection to license its FirstView® Physical Security Information Management (PSIM) software technologies for a range of homeland security, defense and commercial applications. Under this agreement, Rhodeway Networks will also provide various services to Smiths Detection to support their customers using FirstView in the aviation and mass transit security markets.

FirstView is currently being used by several marquee customers including the U.S. Department of Defense and the U.S. Department of Homeland Security, as well as in numerous local and state public safety and law enforcement applications throughout the Country. FirstView was developed for enterprise level command and control applications, integrating a wide range of sensors to securely provide real time situational awareness or forensic analysis from any IP enabled device, be it a workstation, tablet or mobile phone.

“We are pleased to have partnered with Smiths Detection, a leading manufacturer and integrator of security sensors and x-ray imaging systems globally”, said Peter Mottur, President and CEO of Rhodeway Networks. “FirstView is a robust and mature networked security platform and our team is looking forward to further developing the systems’ capabilities and expanding into new markets, while continuing to work with the strong customer base that already exists.”

About Rhodeway Networks, Inc.

Rhodeway Networks is a software and systems engineering company developing, integrating and managing enterprise level solutions for homeland security, defense and commercial customers. Its innovative solutions easily enable legacy cameras and other security devices to be securely distributed and managed over IP based cloud computing networks. Rhodeway’s VizLocker™ systems are offered as a managed web based solution that provides remote monitoring of live or archived video from security cameras and alarm notification from a wide variety of sensors with secure access via computers, tablets or smartphones.

About Smiths Detection Inc.

Smiths Detection offers advanced security solutions in civil and military markets worldwide, developing and manufacturing government-regulated technology products that help detect and identify explosives, chemical and biological agents, radiological and nuclear threats, weapons, narcotics and contraband. It is part of Smiths Group, a global leader in applying integrated, advanced technologies to markets in threat and contraband detection, energy, medical devices, communications and engineered components. Smiths Group employs around 23,000 people in more than 50 countries.
