

Plan Trials More Effectively Using Study Advisor™

BioPharm Clinical's Study Advisor accesses data from the industry's largest pool of 145,000 tracked global trials enabling global clinical operations to plan trials more effectively, reduce cost and delays, mitigate risk and optimize the trial's chance for success.

Using Study Advisor, subscribers enter pertinent protocol information such as indication, inclusion/exclusion criteria, geographic requirements, patient demographics and dozens of other factors. Study Advisor then performs algorithmic calculations based on custom criteria using data from up to hundreds or thousands of comparable trials in order to:

- Forecast enrollment time
- Generate expected recruitment
- Suggest sites and investigators
- Analyze the competitive landscape
- Anticipate likely AEs and obstacles
- Review global trial analytics by indication

By knowing what to expect in advance, you will be able to minimize cost, mitigate risk and give your trial its best chance for success.

Studies w/ Highest Probability of Suspension		Diseases w/ Longest Recruitment Time		Diseases w/ Quickest Recruitment	
	Likelihood Of Suspension		Average No. Days Recruiting		Average No. Days
Prostatitis	8.33%	Drug Delivery	2,066	Pain (Post-Operative)	7
Amyloidosis	5.56%	Kaposi Sarcoma	2,029	Pain (Acute)	31
Endometrial Cancer	4.86%	Sexually Transmitted Diseases (General)	1,722	Muscular Dystrophy	35
Anthrax	4.55%	Amyloidosis	1,533	Dry Eye	105
Leukemia, Chronic Lymphocytic	4.02%	Hypothyroidism	1,521	Contraception	125
Soft Tissue Sarcoma	4.01%	Stem Cell Therapy	1,458	Allergies	129
Leukemia, Acute Myeloid	3.84%	Esophageal Cancer	1,384	Coagulation	129
Myelodysplastic Syndromes	3.81%	Prostatitis	1,324	Acne	136
Ovarian Cancer	3.81%	Von Willebrand Disease	1,292	Human papillomaviruses (HPVs)	141
Internal/External Scars	3.57%	Acromegaly	1,260	RSV Diseases (Viral Respiratory Tract)	146
283 Other(s)	1.17%	220 Other(s)	119,875	220 Other(s)	134,480

Why Choose BioPharm Clinical?

An intuitive user interface, custom searches, personal support and exclusive features make BioPharm Clinical a superior and comprehensive solution to improve global trial management and ultimately increase ROI.
