

› Greater Safety and Productivity

With the special IBR (Ineluctable Blade Retraction) technology the blade automatically retracts into the handle, even when the lever is kept engaged! This is impressive technology, and it protects the user against injuries and the company against avoidable production down-time.

› Optimised Cutting Depth to Protect Your Goods

Thanks to the shallow cutting depth of 11 mm, the risk of damage to contents is minimised when cutting cardboard boxes.

› Productdetails

Installed Blade:	No. 92	
Dimensions L x W x Material Thickness:	26 x 18,5 x 0,40 mm	
Cutting Depth:	11 mm	
This Blade may also be used:	No. 192 stainless	
Certified:	TÜV-Certificate No. S 60040423	
Dimension Product:	L: 13 cm; W: 1,7 cm; H: 4,8 cm	
Weight Product:	58 g	
Dimension Single Unit Box:	L: 14 cm; W: 2,2 cm H: 5,5 cm	
Packaging Unit:	Single Unit Box, 10 in Outer Pack

Merak

The handy all-rounder for precise and effortless cutting

Simply. Cut. Safe.

The Merak is a GS-tested safety knife for **precise cutting** with **fully automatic blade retraction** (IBR technology), which is ideally suitable for **cutting most packaging materials**. A design using **high quality plastics** in a convenient and ergonomic shape is the key to efficient work practices. That means **low-fatigue work practices** and **high productivity** for the company.

Thanks to the shallow cutting depth of 11 mm the **risk of damage to the contents is minimised** when cutting into cardboard boxes.

Designed with a squeeze-grip, this knife is perfectly suitable for both left and right-handed users. The blade is changed **simply, quickly and safely** without using any tools.

Fully Automatic Blade Retraction for Maximum Safety

With its special ineluctable blade retraction (IBR) technology Merak belongs to a group of knives providing a maximum possible level of protection against cutting injuries among knives with extendable blades. Even when the squeeze-grip is kept pressed, the blade automatically retracts after it loses contact with the material being cut.

Transportation Safety Feature as Extra Protection

Engaging the red safety button protects the user against the blade being unintentionally extended. This guarantees maximum protection against injuries when the knife is not in use, or during transportation.

This Quadruple-use Blade saves Time and Money

Perfectly sharpened Solingen high-quality steel blades for simple and extended cutting applications. Blade operation time is increased, and physical effort is reduced in a user-friendly way.

Squeeze-Grip for Convenient Use in Either Hand

The ergonomic squeeze-handle means optimum cutting for left and right-handers alike. This facilitates user-friendly, high-frequency cutting with low fatigue rates. The blade is released for cutting by pressing the red lever.

Rapid Blade Change for Efficient Handling

The blade is changed without any special tool and without dismantling the knife. An integrated magnet prevents the blade falling out unintentionally and becoming damaged.

This knife easily cuts:

- > Cardboard (up to double-walled)
- > Plastic box strappings
- > Cardboard box adhesive tapes
- > Foil and plastic bags
- > Stretch wrap
- > Shrink wrap
- > Paper and sheet material and more.

Useable in any company:

- > Incoming goods and packages department
- > Warehouse
- > Order picking
- > Production
