

Centralize Your Fax Operations to One Location

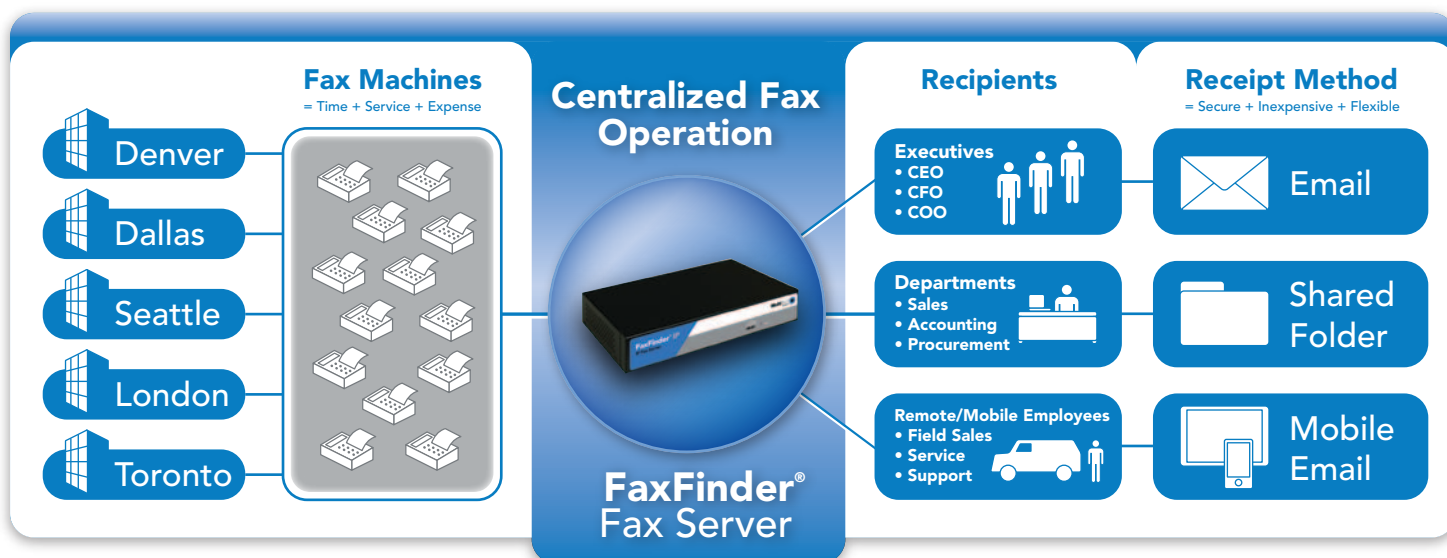

One FaxFinder® fax server can eliminate the need for multiple fax machines and Multi-Functional Peripherals (MFPs) in executive offices, in each department and in regional or remote offices.

Benefits

- Minimize support costs
- Eliminate paper and toner costs
- Reduce energy costs

The FaxFinder fax server is an all-in-one fax server that provides distributed faxing capabilities, over a WAN, for corporate headquarters, remote offices and field sales people. Inbound faxes are delivered to a recipient's in-box or a network folder, so they can be accessed via a personal computer, laptop or mobile device, or printed on a network printer. Outbound faxes can be sent using a Web client or through Microsoft® Office applications.
