

SENDtoNEWS
Share Your Story

SendtoNews™ is the NEXT GENERATION in news distribution

SendtoNews is a cloud-based, B2B relationship management platform and one of the fastest growing multimedia news distribution services on the Internet! It has been developed by news industry professionals as a conduit for newsrooms and content contributors to share story ideas and transfer multimedia content.

Platform Features:

- **High speed file transfer utility:**
Up to 100X faster than HTTP or FTP.
- **Long term searchable storage:**
All files reside on one of the world's largest and most reliable cloud computing networks.
- **Mobile video uploader:**
Upload HD video directly to your SendtoNews account at speed up to 3X faster than normal 3G. 4G & Android coming soon!

For the news industry

- Television
- Radio
- Newspapers
- Other print publications
- Digital news services
- Professional blogs

For content contributors

- Emergency services
- Government agencies
- Universities
- Corporations
- Sports organizations
- Citizen journalists

Why use SendtoNews?

Newsrooms use SendtoNews to save money on expensive satellite, microwave and fibre optic feeds. Newsrooms also use SendtoNews as a replacement for antiquated FTP servers. Content contributors use SendtoNews as a simple, fast and secure connection to reporters, assignment desks and feed rooms all over the world.
