

Secure Business Class Hosting

CNP Integrations' unique & powerful hosting platform:

- **RackSpace Cloud Hosting infrastructure & fanatical server support**
- **Proactive Security Team with patented hacker proof protection solutions**
- **World Class Development, technical support and training services for your web applications**

CNP has built an unmatched hosting service platform with RackSpace Cloud Sites, SecureLive Security Systems, our **Proven Success Processes** and a rapid response service model. Our unique approach brings the best of breed talent, technology and infrastructures to create a scalable platform for growing and managing your business online.

When you host with CNP Integrations we are able to not only provide the most responsive 24/7 technical and development support for your web applications but you also get our unique security protection program and a data back-up and recovery solution included in our service.

CNP integrations offers you enterprise level security and technical support in a way that allows you to be more competitive in a global marketplace and communicate with a broader audience. Open source technologies with CNP Integrations professional service and support combined with our new secure hosting delivers the reliability you need for managing and protecting your business assets.

You can have confidence that your systems are backed up, always on-line and that your data is protected by the best technology available in the industry. Our security team works proactively with the FBI to shut down and prosecute cyber criminals. Our online strategy and support teams protect your data from cyber threats and provide quick turnaround for disaster recovery. CNP integrations has optimized our hosting platform for superior performance and responsive 24/7 technical or development support.

"Quality Hosting, Security and Support is the foundation of running your business online"

Quality Support Faster Innovations Greater Value

- Fully redundant cloud architecture allows for no single point of failure
