

# Full Remote Keyboard

1.

performance and supporting the new iPad's retina display. ISL Light iOS 2.0 offers a great user experience. Beside technical improvements that guarantee really fast and reliable desktop sharing, controlling a remote computer from an iPad or iPhone has become much easier with the new intuitive graphical interface.

"System administrators which have adopted the benefits of accessing the remote computers from mobile devices such as iPad and iPhone, will welcome the implementation of the fully functional remote keyboard which now includes all the keys of a traditional keyboard and allows enhanced remote work to most demanding users," explains a member of ISL Online's development team.

**What is new in the ISL Light iOS 2.0:**

- Redesigned user experience
- Retina display support
- Improved performance
- Mouse modes (locked mouse, free mouse)
- Full remote keyboard
- Send SMS invitations for remote session start
- Active/inactive session detection

All iPad and iPhone owners can [download ISL Light iOS 2.0 from the App Store for free](#) and access or support any remote computer from wherever they are.
