**FIT Technologies and O'Meara, Ferguson, Whelan, and Conway
Announce Acquisition of SchoolOne Software**

CLEVELAND (March 27, 2012) — O'Meara, Ferguson, Whelan, and Conway, a Catholic consultancy, announced the acquisition of the SchoolOne brand, Student Information System (SIS) software and related services from Cleveland-based IT firm FIT Technologies.

"Customizable software from SchoolOne is a great complement to the strategic plans we create to help schools manage their finances while maintaining their Catholic mission and identity," said Patrick O'Meara, president and founder of O'Meara Ferguson. SchoolOne will continue to provide the same customer service and innovative software to its current and future clients in the K-12 school market.

The SchoolOne SIS software tracks important student metrics such as attendance, assignments, grades and behavior. The SIS pairs that relational data with advanced technologies by using learning platforms, mobile interfaces, assessments and collaboration tools. The software has features for administrators, teachers, students and parents to impact school effectiveness.

FIT Technologies CEO Micki Tubbs said, "This transaction allows us to focus on our core IT services business while giving the SchoolOne product and team an opportunity to grow more rapidly, and positively impact more schools in a market where O'Meara Ferguson has such an excellent reputation."

###

About | O'Meara, Ferguson, Whelan, and Conway

www.omerferguson.com

The O'Meara, Ferguson, Whelan, and Conway mission is to provide Catholic organizations with advice and counsel on the best possible use of their temporal resources as they work to further their missions. The company integrates specifically crafted financial strategies, unmatched access to capital financing alternatives, investment management advice, and stewardship-based fundraising counsel to manage and leverage financial assets to build clients' fiscal strength and independence.

About | FIT Technologies

www.FITtechnologies.com

FIT Technologies offers a full range of customized IT services including managed infrastructure, cloud services, needs assessments, technical onsite and field support, disaster recovery, unified communications, and IT consulting projects for small to medium sized businesses and non-profits.

About | SchoolOne Software

www.schoolone.com

SchoolOne leveraged its twelve years of expertise and experience in the K-12 market to develop a new generation Student Information System (SIS). This secure, hosted system provides an integrated and flexible solution that can be readily customized for schools, dioceses, or districts, and easily integrates with other critical applications.
