

MANAGED DATA CENTER +  
NETWORK SERVICES

**Manage Risk** And Improve  
Business Performance

DATA BANK

Over **300,000 rentable square feet** located in the former Federal Reserve Bank of Dallas

# MANAGED DATA CENTER + NETWORK SERVICES

## DATA CENTER

DataBank operates secure, fault tolerant data centers designed to provide 100 percent uptime for your business applications and IT infrastructure. Outsourcing the maintenance and management of these complex facilities to our professional staff enables you to reap the benefits of world-class facilities with little investment of capital and manpower.

## FEDERAL RESERVE

In 2000, an expert telecom development team carefully renovated the former Federal Reserve Bank of Dallas, taking advantage of its inherent security features to create the ideal real estate solution for the technology industry. Our building offers maximum connectivity, robust redundant power and over 300,000 rentable square feet ideally suited for enterprise data centers, disaster recovery, and back-office operations.
