

Next Generation Cognos Mobile Business Analytics for the iPad

### **Overview**

DataClarity DashInsight<sup>™</sup> Mobile is a next-generation native iPad application for IBM Cognos Business Analytics that speeds up and streamlines access to information whenever and wherever it is needed. Organizations can now empower their users to make better and faster decisions with quick and efficient access to existing Cognos report content. DashInsight<sup>™</sup> Mobile leverages all the enterprise scalability and security of the IBM Cognos platform, and allows users to view, analyze, and share their favorite dashboards, reports, and KPI's, simply, efficiently and securely from their iPad.

DashInsight<sup>™</sup> Mobile synchronizes all reports, dashboards, bookmarks, notes and business glossary content with DashInsight<sup>™</sup> on your desktop, and requires no re-authoring or restructuring of your reports and dashboards. Built on a flexible and proven platform with a single administrative interface that streamlines setup and administration, DashInsight<sup>™</sup> is easily deployed and managed at a corporate or departmental level by the business or IT. DashInsight<sup>™</sup> runs on and optimizes your invetment in IBM Cognos 8, Cognos 10 or Cognos Express Reporter, and can be fully-integrated with IBM Cognos TM1.

# Benefits

#### **Enhances Decision-Making Process**

DashInsight<sup>™</sup> Mobile empowers organizations to make better and faster decisions by allowing their users to access and interact with powerful Cognos reports and dashboards.

#### **Increases Productivity and Maximizes Performance**

With DashInsight<sup>™</sup> Mobile users gain trusted insight through a rich and visually stunning native iPad experience wherever and whenever they need access to critical information. DashInsight<sup>™</sup> Mobile enables organizations to better understand, anticipate and shape business outcomes to achieve breakthrough results and outperform the competition.

#### Provides Easy Access to Information and Seamless Navigation

Users can intuitively search, navigate, and analyze familiar reports and dashboards without the need for additional training. Navigation of reports, bookmarks, notes and business glossary is streamlined for both novice and expert users through multiple menu options.

#### Leverages Existing Cognos Report Content

DashInsight<sup>™</sup> Mobile leverages the same content your users work with everyday on their desktops – optimized for the iPad. Within DashInsight<sup>™</sup> users can view, analyze and share their favorite dashboards and reports simply and securely.

#### **Ensures a Collaborative Environment**

DashInsight<sup>™</sup> Mobile arms users with collaboration capabilities that allows them to share insights with others. By connecting users with key information, DashInsight<sup>™</sup> Mobile enables fast decision-making process and helps organizations to stay competitive.

#### Provide a Strong and Reliable Integration Platform

DashInsight<sup>™</sup> Mobile deploys in days and leverages the enterprise scalability and security of the IBM Cognos Platform.

## Features
