

rediSend Solution Brief
Document Delivery Solutions
for **SAP Business One**

rediSend is a full featured document delivery solution for SAP Business One. With rediSend you can organize and deliver marketing documents and reports in a wide variety of formats with just a Click. rediSend will help save time and increase efficiency in your day-to-day operations

BENEFITS

Intelligent Document Routing – Flexible capabilities enable you to maintain document delivery preference for each business partner and help you send the right document in the right format using the right delivery method.

Improves Efficiency and Saves Time – Ability to send email, fax, SMS and archive documents in a click saves valuable time and increases productivity. Activity logs and error reports help you monitor processes and ensure that business partners receive the documents on time.

Reduces Redundant Work – The option to print a batch of marketing documents through the Document Printing function in SAP Business One and the ability to process Customer Statements and delivering them in a click helps avoid redundant work by eliminating the need to process one document at a time

Synchronous Routing – Multi-mode operation enables sending the document simultaneously using multiple delivery methods avoiding the need to process them individually for each delivery type.

Personalized Messages – Ability to create email and fax messages in different languages gives you the flexibility to maintain a personal touch and cater to your business partner's preferences.

Highly Adaptable – The SQL data querying function makes access to any business data simple and facilitates using them in your communications. This makes dynamic composing of messages with contextual data possible.

Secured Documents – The data encryption and password protection feature will facilitate compliance with security guidelines and protect your business data.
