LOGICIM
XLGL

 *XLGL is a 'Must Have'. It creates dynamic and complex reports that could only be achieved before by exporting from Simply Accounting to Excel and required hours of cutting and pasting, often to be repeated month after month. By using XLGL I have saved a number of my clients at least 8 to 12 hours a month, producing reports they can now have at a click of a button.*

Logicim XLGL is a Microsoft Excel™ add-in. Once installed, you will have a new XLGL menu in Excel and a suite of new worksheet functions designed to access and summarize data from Simply Accounting™. **Logicim XLGL** leverages the Microsoft Excel™ calculation engines so you can update a report by simply changing some values in cells. For example, to obtain a balance sheet for a new date, you would simply change the date in a cell and the worksheet will recalculate itself to show your new balance sheet. That's it!
