

## **Advanced Burglar Alarm Siren Introduced by Elite Security Services as the Latest Component of their [Home Security Systems](#).**

Enterprising [home security systems](#) company Elite Security Services has just announced yet another significant enhancement of their service packages. All their domestic surveillance packages would now include highly advanced loud burglar alarm sirens. Elite Security Services is one of the most promising security service providers in entire Canada and the United States.

Loud alarms sirens would now be a part of the advanced [home security systems](#) offered throughout America and Canada by Elite Security Services. The company has been operating since last few months in these two countries and have repeatedly made enhancements to their security plans to provide better service to customers. The new burglar alarm device would be available with all three security plans offered by the company. The addition of this efficient burglar alarm would surely add more vigor to the security systems from the company. The component was launched officially by the founder of Elite Security Services, Mr. Paul Shakuri.

All modern day [home security systems](#) generally include a burglar alarm. These devices are highly effective in preventing burglars from breaking into residential premises. A good burglar alarm system needs to be loud enough for the people in the vicinity to be aware of its presence. The alarm device introduced by Elite Security Services has an extremely high pitched alarm that can inform the entire neighborhood if any security incident takes place. Talking during the official launch of the device, Mr. Shakuri stated, "We've been working on this device for quite sometime now. This burglar siren has extraordinary benefits and would provide you security that can't be breached easily".

Mr. Shakuri's company Elite Security Services has gained immense popularity recently by providing [home security systems](#) with advanced features within a tight budget for common house owners. Apart from the burglar alarm, other noteworthy components of their systems include advanced sensors, motion detectors, digital keypad, remote control, and many more. The company also has specially designed home protection plans that can function even in the absence of home power supply and telephone line.

About the Company: Elite Security Services is a rapidly growing company in the home security industry. They offer highly efficient and economical home security solutions in America and Canada.
