# FixLogix

FixLogix modular T-slot fixture systems simplify part-holding for inspection and assembly. Infinite adjustability lets you put locating components where you need them without restriction. FixLogix costs a fraction of the price of competing systems, providing the most versatile and economical system on the market today. Our systems are available in English or Metric.

◂ **Laser engraved** fixture plates with reference scales and alpha-marked T-slots make repeat setups fast and simple.

◂ **Self-wedging tension clamps** are extremely rigid, yet allow for near zero clamping force.

◂ **Slotted risers & cross-slides** with reference scales provide infinite linear and angular adjustability in multiple axis.

◂ **1/4-20 threads** cross-compatible with many other systems.

Standard Component kit **#CCK1 Price: $1049.00**	**Small part component kit** **#CCK-75S Price: $920.00**

FixLogix CMM component kits are comprehensive, yet economical. The kits feature **stainless steel** and **hard anodized** components to reduce wear and corrosion. Our components are modeled 3D in CAD, and files are available.

Save major time and money **on frequent repeat setups** with our **Rapid** turn-key CMM fixtures. A typical semi-dedicated fixture using FixLogix standard components on a 12" x 12" plate can be shipped in 24-48 hours, at a typical cost of $350-$500!
