Manage Your Private Cloud

- Identify application roles running on virtual machines
- See real time performance of applications running on virtual machines
- Use embedded historical data + real time data for timely troubleshooting

Capacity Planning for Hyper - V

32 GB	
28 GB	Win2008 3.1 GB
	SharePoint 2010 3.6 GB
24 GB	
	SCVMM 2012 4.9 GB
20 GB	
16 GB	SQL2008R2 5.4 GB
12 GB	Exchange 2010 6.2 GB
8 GB	
4 GB	SCCM 2010 7.4 GB
0 B	

Win2008R2 2.9 GB

SCOM 2012 4.3 GB

SCSM 2012 5.9 GB

SQL 2012 6.1 GB

Exchange 2007 6.4 GB

**HYPERV01
(30.6 GB/32 GB)**

**HYPERV02
(25.6 GB/32 GB)**

Optimize with Capacity Planning

- Identify hosts and virtual machines that are resource constrained
- Identify hosts with extra capacity when deploying new workloads
- Plan for future growth using predictive analytics

Features

Replay the Past
- All charts can replay past performance
- See how changes affect the performance of critical services
- Combine real-time with OpsMgr historical data

Capacity Management
- Control virtual machine sprawl
- Proactively identify capacity bottlenecks
- Optimize virtual machine density

Real-time Operations
- Dozens of critical performance graphs on one screen
- Self-learning performance thresholds know what is normal
- Visual alerts proactively indicate performance problems

See Every Change
- See change history directly on performance charts
- Link back to Service Manager to see change's scope
- Remotely diagnose errant changes in real-time

Put Vital Signs in Perspective

Using Vital Signs in conjunction with Savision's Live Maps gives IT Pros unparalleled real-time mapping and executive dashboard capabilities.

Live Maps creates a high-level view thats adds the necessary context to understand how applications flow across environments. Live Maps allows IT Pros to map networks, systems, services and business processes onto dynamic and easy-to-understand dashboards.

Vital signs combines real time and historical performance data for timely troubleshooting. It is the only management solution that not only understands the Microsoft Private Cloud, but also what's in it. Vital Signs has powerful capacity management features to help you optimize your Microsoft Private Cloud today, and plan for the future.

IT Pros who use Live Maps and Vital Signs are able to provide the best perspective for every IT user in an enterprise.

Real Time Map

Business Office

Dashboard

Rack

Server

Supported Dashboards

Vital Signs currently has expert dashboards for the following applications:

Microsoft
Windows Server System

Windows Server 2008
Hyper-V

Microsoft
Exchange Server

Microsoft
SQL Server

Enabling the Fastest Time to Resolution of Your IT Problems
