

SAP® Services and Solutions @ YASH

Consulting. Implementation. Full Life-cycle SAP Support.

Organizations that invest in SAP® optimize their operations, streamline business processes, integrate disparate systems, and utilize best-of-breed technology to get ahead of their competition.

Organizations that partner with YASH Technologies™ for full lifecycle management of their SAP investments receive a wealth of resources with deep expertise, global capabilities, rock solid track record, responsiveness, and the ability to transform their business from survival mode to innovation.

Comprehensive Portfolio of SAP Solutions and Services

Global customers rely on YASH to maximize the ROI of their SAP investments. YASH views SAP as an enabler, helping organizations to do more. As a leading, best-in-class enterprise software, SAP helps companies to achieve exceptional operational performance, increase revenues in existing markets and rapidly enter new ones, as well as deliver products and/or services more effectively.

Through our SAP Center of Excellence (CoE), YASH offers end-to-end solutions and services that meet your changing business requirements. Our comprehensive SAP portfolio is a holistic approach that speeds benefit realization from your SAP investments.

Implementation Services based on Best Practices

SAP best practices are industry specific business scenarios that support all of the major business processes and benefit companies of all sizes. To significantly reduce cycle times and project costs, while improving productivity and feature richness, YASH leverages SAP's prepackaged components. We extend cost savings further by utilizing our accelerators and proprietary implementation methodology - S-Imple, to greatly lower risk and add cost predictability.

Besides core SAP ERP, YASH consults on, implements and supports the following business solutions:

HCM, CRM, SCM, BI, Enterprise Portal, SRM, Netweaver.

YASH can help you discover ways to optimize existing investments and ensure new ones are aligned with business initiatives.

Outsourcing Application Management Services (AMS)

For many customers, YASH's global delivery framework for SAP AMS makes the difference on driving profitable growth, producing significant returns and benefits. As a partner that is SAP Certified in Application Management Services, our AMS portfolio is the right solution for proactively supporting business users and the entire lifecycle of your SAP environment from planning, implementing, operating, optimizing and extending your application landscape.

Utilizing the Run SAP methodology, YASH brings predictable value leveraging best-in-class procedures, processes, templates and reporting mechanisms, laying a strong foundation for comprehensive solution management.

Core AMS

- Contributing & Testing Partner for SAP Best Practices for the Chemical Industry (US & India)

Global Delivery

- Flexible “right-shoring” partnerships
- Full lifecycle offshore support
- Strategically located delivery centers
- 24x7 support with highly experienced teams

Accelerators/Tools for

- Implementation
- Support
- Enhancements and Upgrades

Business Intelligence Services within SAP

YASH consultants can work with you to plan and implement the solutions you need to efficiently practice business intelligence (BI), information management, and enterprise performance management (EPM) across both SAP's Netweaver BI platform and Business Objects BI Suite.

- Business intelligence - Helps plan and develop the architecture needed to run a robust, scalable, and cost-effective business intelligence (BI) infrastructure, providing performance analytics services that utilize a business-centric methodology and identifying key performance drivers that can help organizations leverage both management and operational reporting processes and interactive executive dashboards
- Information management - Supports the distribution of integrated, accurate, and timely data across the enterprise, enabling strategic decision making via the delivery of the right information to the right people at the right time
- Enterprise performance management - Helps assess how well an organization's enterprise performance management (EPM) processes align with its IT environment, providing support in planning and deploying solutions that are appropriate for a specific strategic context

SAP Business All-in-One Solutions

Designed for Small and Medium Enterprises (SMEs), YASH's certified Business All-in -One solutions are complete, preconfigured solutions that are based on the highly scalable SAP Business Suite and SAP Best Practices. With a defined scope and fixed cost, organizations benefit with rapid implementations and a comprehensive, out-of-the box ERP system.

S-Imple Methodology for Implementations Significantly Reduces Costs

By effectively reducing the overall project cycle time through the use of accelerator tools, best practices, and proven methodologies, YASH speeds up realization of benefits. With our S-Imple methodology based on Scrum principles, YASH dramatically reduces blueprinting, development and testing phases as customers are involved in the early stages of the implementation. By leveraging pre-configured business scenarios, YASH minimizes customization and customers are able to view changes easily via playback sessions. The process-centric management of project implementations means customers get the right solution the first time.

Our technical and business process expertise includes a wide range of SAP applications and extends to other areas that touch the enterprise. By incorporating our domain expertise in areas such as data warehouse solutions and analytics, YASH can provide scalable, holistic solutions that nurture highly effective business operations and reduce the Total Cost of Ownership (TCO) of the SAP landscape.

Do More with YASH as your SAP Partner

As SAP specialists, we help you realize the extensive benefits of SAP by discovering ways to optimize existing system functionality, eliminate inefficiencies, and tap into business intelligence and analytics for increased transparency into business operations. Our processes and methodologies work in tandem to leverage SAP for profitable growth and offer a shift towards enhancing enterprise performance.
