

## PowerNet Global Expands Wireless Broadband Coverage for Local Businesses

*Wireless network will provide high-speed Internet to businesses across greater Cincinnati and Northern Kentucky.*

**CINCINNATI, OH – April 18, 2012** – [PowerNet Global](#), veteran of the telecommunications industry for more than 20 years and well known for strong business ethics, integrity, and reliability, today announced expansion of coverage to offer high-speed Internet service to more businesses in greater Cincinnati and Northern Kentucky areas.

Joining forces with [DBI Technology Solutions](#), PowerNet Global installed new towers that provide an additional 55 square miles of coverage in northern and southern parts of Cincinnati. PowerNet Global is now able to service businesses in downtown Cincinnati, Clifton, Delhi, Fairfield, Green Township, City of Hamilton, Price Hill, Western Hills, and other surrounding areas. In Northern Kentucky, Covington, Ludlow, and Vista Hills are also serviceable.

The wireless broadband service, powered by a high performance redundant network backbone that leverages PMP 320 fixed point-to-multipoint technology from [Motorola Solutions, Inc.](#), allows PowerNet Global to offer businesses a broad range of connectivity options.

"Most people are not aware that their business has an alternative to the traditional high speed Internet service providers in this market," said John Putnam, vice president of direct sales at PowerNet Global. "Whether the Internet connection is used for voice or data, as primary or even a back up connection, with a starting price point of \$79.95 per month, businesses can get higher quality service for less."

With plans to further expand coverage in the fall, PowerNet Global will be able to provide broadband service to northeast areas of Cincinnati, including Blue Ash, Deer Park, Hyde Park, Montgomery, Kenwood, and other nearby areas.
