## Oxygen Conducts Advanced iOS and Android Forensics Training

Oxygen Software announces series of upcoming training events. Advanced iOS Forensic Training and Advanced Android Forensic Training events will be held in June 2012 in London, UK. The training sessions will teach customers extract information from iOS and Android devices, covering popular topics such as platform history, device models, differences in GSM/CDMA/4G devices, forensic differences between the many iOS and Android versions. The sessions will cover information storage principles in mobile devices, data protection implemented in different versions iOS and Android, and provide detailed information about the different acquisition methods available. The training sessions will teach attendees how to discover deleted data, decrypt keychain items, root and jailbreak devices, and cover many other topics and techniques required for successful investigations.

The first Standard license training and certification will be held in June 2012, Myrtle Beach, USA. After the training all the attendees receive unique official certificates and prolonged license keys containing information about the certification that is displayed in Oxygen Forensic Suite interface and reports.

### About Advanced iOS and Android Forensic Training

Advanced iOS Forensic Training and Android Forensic Training programs are designed for experienced investigators, IT security and forensic specialists. The sessions give an overview of state-of-the-art operating systems, hardware and software available for supported platforms, provide detailed information about forensic differences between prior and current generation platforms, and teach attendees the most effective techniques of extracting protected information out of supported devices.

More information about the upcoming forensic training series will be announced on the company's Web site at <http://www.oxygen-forensic.com/en/training/>

### Pricing, Venues and Dates

The training event will be held in London, UK on June 18-19 and 20-21. Online registration is now open:

- Advanced iOS Forensics: [http://www.oxygen-forensic.com/en/training/2012\\_06\\_uk\\_london\\_ios.php](http://www.oxygen-forensic.com/en/training/2012_06_uk_london_ios.php)
- Advanced Android Forensics: [http://www.oxygen-forensic.com/en/training/2012\\_06\\_uk\\_london\\_android.php](http://www.oxygen-forensic.com/en/training/2012_06_uk_london_android.php)

Participation costs 999 GBP and includes a 2-day training course on either iOS or Android forensics.

Attendees are eligible for a 30% discount towards an Oxygen Forensic Suite 2012 edition of their choice. Companies with four or more attendees will be eligible for one free Analyst license.

### Free Standard license Training and Certification

Oxygen Software has recently updated its licensing policy, making the Standard edition of Oxygen Forensic Suite 2012 available free of charge for the first 6 month. Under the new terms, the Standard edition of the company's flagship mobile forensic tool becomes free to eligible customers providing they take Oxygen-approved forensic training. Customers passing a certified training may not only keep their free license, but also receive one year of free updates. Under the current terms, certified customers receive the time-unlimited right to use Oxygen Forensic Suite 2012 Standard at no charge. With certified training courses, Oxygen offers forensic specialists an opportunity to obtain the tool and skills necessary to extract evidence out of the many mobile devices available on the market today.

Customers passing the training will also receive a status as a Certified Oxygen Forensic Suite User, accompanied by newly issued license keys containing certification information. Certification information will be displayed in the program's main window, and will be embedded in all reports created by Oxygen Forensic Suite.

## Oxygen Certified Forensic Training Series

The Myrtle Beach event is the first of the coming Oxygen Certified Forensic Training Series. The training event will be held in Myrtle Beach, USA on June 2, 2012. Online registration is now open:

[http://www.oxygen-forensic.com/en/training/2012\\_06\\_us\\_myrtlebeach.php](http://www.oxygen-forensic.com/en/training/2012_06_us_myrtlebeach.php)

Participation costs USD 795 and includes a 1-day intensive training.

Users of free 6-month licenses for Oxygen Forensic Suite 2012 are encouraged to participate in this event in order to keep their free licenses.

## About Oxygen Forensic Suite 2012

Oxygen Forensic Suite 2012 helps investigators and forensic specialists access and analyze data from a variety of mobile devices such as cell phones, smartphones, communicators, PDA and tablet PCs. Currently supporting more than 4200 different models, Oxygen Forensic Suite 2012 covers the widest range of mobile devices compared to competition, and allows fully automated acquisition and analysis of supported devices.

The unique Timeline feature offers convenient, single-place access to all activities and movements performed by the user arranged by date and time. Investigators can track user location at every moment, build and map their historic routes, and clearly see all activities performed by the user at each location.

Another signature feature of Oxygen Forensic Suite allows investigators performing a global search on all devices ever analyzed with the toolkit. The global search quickly reveals any connections (e.g. common contacts, exchanged calls, texts or emails) between the phone owners.

Oxygen's statistical analysis tools allow investigators discover social connections between the users of multiple mobile devices. Calls, text messages and Skype conversations are analyzed to produce charts and tables revealing the users' closest circle at a glance.

Oxygen Forensic Suite 2012 guarantees zero-footprint operation, leaving no traces and making no modifications to the content of the devices, making it the tool of choice among government and law enforcement agencies, security services and forensic organizations in more than fifty countries.

## About Oxygen Software

Founded in 2000, Oxygen Software offers the most advanced forensic data examination tools for smartphones and mobile devices. The company is dedicated in delivering the most universal forensic solution covering the widest range of mobile devices running Symbian, Windows Mobile, Blackberry, iOS, and Android operating systems. As a result, Oxygen Forensic Suite receives great response at forensic conferences, exhibitions and trainings, and occupies a spot in the top of the list in relevant tests for extracting more data than competition.
