Resco Mobile CRM

Power of Microsoft Dynamics CRM in your mobile device

Resco Mobile CRM is a mobile client solution optimized for Microsoft Dynamics CRM offering advanced customization capabilities. The app works in online/offline mode and synchronizes local data with Microsoft Dynamics CRM. Visual customization tools allow the comprehensive customization of application, adding custom CRM entities, custom fields, defining dashboard, multiple views, charts or adding custom functionality.

App—Access CRM data on the go

Access your CRM data on any mobile platform:

 iPhone, iPad   Android   Windows Phone 7   Windows Mobile, Win CE, Tablet PC

Meet the most advanced mobile CRM app in the market. The out-of-the-box version offers dashboard, maps, charts and access to the most frequently used entities. You do not need to install any middleware, server components or servers. Download the app, sync it with Microsoft Dynamics CRM and enjoy mobility.

Architecture—Simple and straightforward

Resco Mobile CRM is a solution working in online/offline mode that takes advantage of local database storing data and standard Microsoft Dynamics CRM Web Service. When needed, the app can be switched to online mode. The solution does not require any middleware or server—the mobile client communicates directly with the Dynamics CRM server.

Woodford—Powerful customization and administration tool

Resco Woodford is an easy to use tool that allows customization and administration of the app. No development skills? Don't worry; you only need a mouse to add custom entities, redesign the app, configure dashboards or charts, create multiple views or define sync filters.

Woodford also allows managing mobile users, mobile devices and remotely wipeing out the data. All changes and customization appear on the mobile device after the synchronization.

Mobile CRM Studio — Full control over the app

Resco Studio comes handy if your requirements are high or if you expect custom code implementation. Try Resco's developer platform integrated with Microsoft Visual Studio and benefit from the full access to source code. Utilize the single .NET environment to cover all mobile operating systems thanks to the Mono compilation tools. Mobile CRM Studio is an omnipotent multiplatform customization tool that eliminates all compromises.
