Easy to use, your online auction portal

Many templates to choose from

Set up your event in minutes

About Us

Since 1995, Event Payment Services has been building our expertise with all aspects of the automatic payment solution process, whereby we developed a legacy of valuable information for our clients. We understand and respond to the challenges our customers face, and that is the foundation on which WeRaiseIt was conceived and developed.

We felt that our customers deserve and need an "all-inclusive" tool that is easy-to-use, customizable, highly secure and affordable — one that is extremely user-friendly, even for those with no technical experience. So we developed WeRaiseIt. We think you'll love it since it's exactly what you ordered.

How Does WeRaiseIt Work?

Start by simply registering your organization, and choosing one of the eye-catching designs from our selection of easy-to-use templates. Next you'll have the opportunity to customize it with colors, logos and content that will personalize and brand your site. WeRaiseIt will never cross-promote on your site, so you and your sponsors can feel like it's truly your own.

- Create a website to host auctions and events
- Choose one of several attractive design templates
- Customize your site with the user-friendly interface
- No technical skills required to create and launch your portal
- Create an html link to your current website
- Safe and Secure

Live Events

There's a better way to process credit card payments at your fundraising events.

Our ePSPay™ terminal provides:

- Credit card registration with bid number
- Increased revenues with ePSPay™ registration participation
- Decreased time spent waiting in check-out lines
- Synchronized multiple terminals at your events of guest's purchases with our ePSPay™ flashdrive
- Less time spent on reconciliation
- Saves time and money
- Provides a secure environment for credit card transactions

USB Flashdrive

Dejavoo - Linux Operating System and Dual Communications: Internet Protocol/Dialup

With ePSPay™, managing the collection of credit card payments is just as easy as using an ATM machine, and the entire process is 100% secure.
