SugarCRM – Authorize.Net Integration Version 2

Spec Sheet

Authorize.Net®
a CyberSource solution

Overview

SugarCRM is the leading open source CRM software package in the world. Authorize.Net enables merchants to authorize, settle and manage credit card and electronically check transactions via Web sites, retail stores, mail order/telephone order (MOTO) call centers and mobile devices.

The FBSG **Sugar CRM – Authorize.Net Integration Application** allows you to securely enter credit card billing information on Authorize.Net from within Sugar CRM. Authorized users are able to charge and authorize credit cards for specific amounts. When using this enhancement, your client profiles and billing information will be organized and safely stored for easy access.

Key Benefits

- Safe and simple credit card transactions that are in compliance with all credit card laws.
- Protection of all your client profiles and billing information.
- Create quick and easy profiles with credit card data for all your customer quotes.
- Avoid re-entering billing information for returning clients.
- Fast and secure client billing and reprocessing of payments
- Easy updating of all customer billing information
- Ability to authorize and charge cards from Accounts, Contacts, and Quotes
- Ability to place authorize and charge buttons in custom locations

Adding Credit Card Information to your authorize.net account:
